Warranty

(1) Warranty

THE SPECIFICATIONS AND INFORMATION REGARDING THE PRODUCTS IN THIS GUIDE ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL STATEMENTS, INFORMATION, AND RECOMMENDATIONS IN THIS GUIDE ARE BELIEVED TO BE ACCURATE AND PRESENTED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. USERS MUST TAKE FULL RESPONSIBILITY FOR THEIR APPLICATION OF PRODUCTS.

(2) Disclaimer

YEALINK (XIAMEN) NETWORK TECHNOLOGY CO., LTD. MAKES NO WARRANTY OF ANY KIND WITH REGARD TO THIS GUIDE, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Yealink (Xiamen) Network Technology CO., LTD. shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance, or use of this guide.

(3) Limitation of Liability

Yealink and/or its respective suppliers are not responsible for the suitability of the information contained in this document for any reason. The information is provided “as is”, and Yealink does not provide any warranty and is subject to change without notice. All risks other than risks caused by use of the information are borne by the recipient. In no event, even if Yealink has been suggested the occurrence of damages that are direct, consequential, incidental, special, punitive or whatsoever (Including but not limited to loss of business profit, business interruption or loss of business information), shall not be liable for these damages.

End User License Agreement

This End User License Agreement (“EULA”) is a legal agreement between you and Yealink. By installing, copying or otherwise using the Products, you: (1) agree to be bounded by the terms of this EULA, (2) you are the owner or an authorized user of the device, and (3) you represent and warrant that you have the right, authority and capacity to enter into this agreement and to abide by all its terms and conditions, just as if you had signed it. The EULA for this product is available on the Yealink Support page for the product.
Patent Information

China, the United States, EU (European Union) and other countries are protecting one or more patents of accompanying products and/or patents being applied by Yealink.

Customer Feedback

We are striving to improve our documentation quality and we appreciate your feedback. Email your opinions and comments to DocsFeedback@yealink.com.

Technical Support

Visit Yealink Wiki (http://support.yealink.com/) for the latest firmware, guides, FAQ, Product documents, and more. For better service, we sincerely recommend you to use Yealink Ticketing system (https://ticket.yealink.com) to submit all your technical issues.
GNU GPL INFORMATION

Yealink T4X series IP phones firmware contain third-party software under the GNU General Public License (GPL). Yealink uses software under the specific terms of the GPL. Please refer to the GPL for the exact terms and conditions of the license.

The original GPL license, source code of components licensed under GPL and used in Yealink products can be downloaded online: http://www.yealink.com/onepage_83.html.

About This Guide

Thank you for choosing Yealink T4 series IP phones, which deliver the industry’s leading HD audio quality and a wide range of business telephony features, such as Call Hold, Call Transfer, Busy Lamp Field, Call Recording, Multicast Paging and Conference over an IP network. Meanwhile, it features a compact appearance, robust performance and cost efficiency for daily desktop voice communications.

This guide provides everything you need to quickly use your new phone. Firstly, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Quick Start Guide which can be found in your phone package before you set up and use the IP phone. As you read this guide, keep in mind that some features are configurable by your system administrator or determined by your phone environment. As a result, some features may not be enabled or may operate differently on your phone. Additionally, the examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen.

This user guide contains information for the following Yealink products:

- SIP-T48S IP phones
- SIP-T48G IP phones
- SIP-T46S IP phones
- SIP-T46G IP phones
- SIP-T42S IP phones
- SIP-T42G IP phones
- SIP-T41S IP phones
- SIP-T41P IP phones
- SIP-T40P IP phones
- SIP-T40G IP phones

Read the Yealink Products Regulatory Notices guide for all regulatory and safety guidance.

Related Documentation

You can obtain additional information on the following phone’s support pages:

- Ultra-elegant Gigabit IP Phone SIP-T48S
- Ultra-elegant Gigabit IP Phone SIP-T48G
- Ultra-elegant Gigabit IP Phone SIP-T46S
- Ultra-elegant Gigabit IP Phone SIP-T46G
- Ultra-elegant Gigabit IP Phone SIP-T42S
- Ultra-elegant Gigabit IP Phone SIP-T42G
- Ultra-elegant IP Phone SIP-T41S
- Ultra-elegant IP Phone SIP-T41P
- Enterprise IP Phone SIP-T40P
- Enterprise IP Phone SIP-T40G

The following types of related documents are available on each support page:

- Release Notes, which details bug fixes and feature enhancements when an update is released.
- Quick Start Guide, which describes how to assemble your phone and configure the basic phone features.
• Wall Mount Installation Guide, which provides detailed instructions for how to use an optional wall mount bracket to mount your phone on the wall.
• Administrator Guide, which provides the detailed information on how to configure phone features for system administrator.
• Regulatory Notice, which provides information for all regulatory and safety guidance.

In This Guide
This guide mainly takes the SIP-T46S IP phone as an example. Chapters in this guide include:

• Chapter 1 About This Guide
• Chapter 2 Getting Started with Your Phone
• Chapter 3 Customizing Your Phone
• Chapter 4 Audio Settings
• Chapter 5 Directory
• Chapter 6 Call History
• Chapter 7 Call Features
• Chapter 8 Advanced Features
• Chapter 9 Optional Accessories with Your Phone
• Chapter 10 Maintaining Your Phone
• Chapter 11 Appendix - Menu Structure
Getting Started with Your Phone

This chapter provides the overview of phone hardware and screen layout, and how to navigate your phone for the best performance.

Topics
- Hardware Overview
- Screen and Icons
- Entering Characters on T46S/T46G/T42S/T42G/T41S/T41P/T40P/T40G

Yealink T4 Series IP Phones User Guide

**NO.** | **Item** | **Description**
---|---|---
1 | TRANSFER Key | Transfers a call. Only the SIP-T46S/T46G IP phone has TRANSFER key. **(default)**
2 | Speakerphone Key | Toggles the speakerphone (hands-free) mode or not. The LED indicator glows green when the speakerphone is activated. The SIP-T40P/T40G IP phone does not have key light. **(default)**
3 | Volume Key | Adjust the volume of handset, headset, speaker, ringer, or media. **(default)**
4 | Keypad Keys | Allow you to enter numbers, letters, and special characters. If a menu item has an index number, you can use the keypad keys to select the item. **(default)**
5 | Navigation Keys | • Scroll through information or options displayed on the screen. • Access History and Directory respectively. **(default)**
6 | OK Key | Confirms actions or answers incoming calls. **(default)**
7 | Cancel Key | Cancels actions or rejects incoming calls. **(default)**
8 | Soft Keys | Access the function displayed on the screen above the soft keys. The soft keys change depending on what you are doing at the time. **(default)**
9 | Speaker | Provides ringer and speakerphone audio output. **(default)**
10 | Reversible Tab | Secures the handset in the handset cradle when the IP phone is mounted vertically. For more information on how to adjust the reversible tab, refer to Yealink Wall Mount Quick Installation Guide for Yealink IP Phones. **(default)**
11 | Hookswitch | Connects or disconnects the phone from the phone line. The hookswitch is automatically activated when a user lifts the handset from the cradle to get a dial tone. **(default)**

### Power LED Indicator

<table>
<thead>
<tr>
<th>LED Status</th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>The phone is initializing.</td>
</tr>
<tr>
<td>Fast-flashing red (300ms)</td>
<td>The phone is ringing.</td>
</tr>
<tr>
<td>Slow-flashing red (1s)</td>
<td>The phone receives a voice mail or text message.</td>
</tr>
<tr>
<td>Solid red for 500ms and off for 3000ms alternately</td>
<td>The phone enters power-saving mode. It is only available on the SIP-T48S/T48G/T46S/T46G IP phone.</td>
</tr>
</tbody>
</table>

**Note**
The above introduces the default LED status. Your system administrator can configure the status of the power LED indicator.

### Line Key LED

By default, the line keys are associated with the phone lines. You can set line keys as phone feature keys, and press line keys to access the configured phone features.

**Line key LED** (default)
### LED Status

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid green</td>
<td>The line is seized.</td>
</tr>
<tr>
<td></td>
<td>The line is in conversation.</td>
</tr>
<tr>
<td>Fast-flashing green</td>
<td>The line receives an incoming call.</td>
</tr>
<tr>
<td>Slow-flashing green</td>
<td>The call is placed on hold.</td>
</tr>
<tr>
<td>Off</td>
<td>The line is inactive.</td>
</tr>
</tbody>
</table>

**Line key LED** (configured as a Forward key with a value (destination number))

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid green</td>
<td>The always forward feature is activated.</td>
</tr>
<tr>
<td>Off</td>
<td>The always forward feature is deactivated.</td>
</tr>
</tbody>
</table>

**Note**

If the value (the destination number) is not configured for a Forward key, the key LED glows green when the always/busy/no answer forward feature is activated. It is off when the always/busy/no answer forward feature is deactivated.

**Line key LED** (configured as a BLF key or BLF List key)

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid green</td>
<td>The monitored user is idle.</td>
</tr>
<tr>
<td>Fast-flashing red (200ms)</td>
<td>The monitored user receives an incoming call.</td>
</tr>
<tr>
<td>Solid red</td>
<td>The monitored user is busy.</td>
</tr>
<tr>
<td></td>
<td>The monitored user’s conversation is placed on hold (This LED status requires server support).</td>
</tr>
<tr>
<td>Slow-flashing red (1s)</td>
<td>The call is parked on the monitored user.</td>
</tr>
<tr>
<td>Off</td>
<td>The monitored user does not exist.</td>
</tr>
</tbody>
</table>

**Line key LED** (used as a page switch key)

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>There is a call parked on the line whose line key is not on the current page.</td>
</tr>
<tr>
<td>Fast-flashing green</td>
<td>The line receives an incoming call on the line key of the non-current page.</td>
</tr>
<tr>
<td>Fast-flashing red</td>
<td>The monitored user receives an incoming call line whose line key is not on the current page.</td>
</tr>
<tr>
<td>Off</td>
<td>The line keys are idle.</td>
</tr>
</tbody>
</table>

**Line key LED** (associated with a shared line)

The Local SCA Phone is involved in an SCA call, while the Monitoring SCA Phone is not involved in the SCA call and used for monitoring shared line.
<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The shared line is idle.</td>
</tr>
<tr>
<td>Fast-flashing green</td>
<td>The shared line receives an incoming call.</td>
</tr>
<tr>
<td>Solid green (Local SCA Phone)</td>
<td>The shared line is busy or is in a call.</td>
</tr>
<tr>
<td>Solid red (Monitoring SCA Phone)</td>
<td>The shared line is dialing.</td>
</tr>
<tr>
<td>Solid red (Monitoring SCA Phone)</td>
<td>The shared line is seized.</td>
</tr>
<tr>
<td>Slow-flashing green (Local SCA Phone)</td>
<td>The call on shared line is placed on public hold.</td>
</tr>
<tr>
<td>Slow-flashing green (Local SCA Phone)</td>
<td>The call on shared line is placed on private hold.</td>
</tr>
<tr>
<td>Slow-flashing green (Local SCA Phone)</td>
<td>In a multi-party call, all the participants place the call on hold.</td>
</tr>
</tbody>
</table>

**Line key LED** (associated with a bridged line)

The Local BLA Phone is involved in a BLA call, while the Monitoring BLA Phone is not involved in a BLA call and used for monitoring bridged line.

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The bridged line is idle.</td>
</tr>
<tr>
<td>Fast-flashing green</td>
<td>The bridged line receives an incoming call.</td>
</tr>
<tr>
<td>Solid green (Local BLA Phone)</td>
<td>The bridged line is busy or is in a call.</td>
</tr>
<tr>
<td>Solid red (Monitoring BLA Phone)</td>
<td>The bridged line is dialing.</td>
</tr>
<tr>
<td>Slow-flashing green (Local BLA Phone)</td>
<td>The bridged line is seized.</td>
</tr>
<tr>
<td>Slow-flashing red (Monitoring BLA Phone)</td>
<td>The call on bridged line is placed on hold.</td>
</tr>
</tbody>
</table>

**Screen and Icons**

Before you use the phone, you need to understand the state of your phone, including phone screen layout and icons.

**Topics**

- Idle Screen
- Dialing/Pre-dialing Screen
- Calls Screen
- Icons in the Status Bar
- Line Key Icons
- Call History Icons

**Idle Screen**

The Idle screen is made up of three parts: the status bar, line keys and soft keys. The time & date displays on the status bar or middle of screen that varies by phone models.
Getting Started with Your Phone

- **Status Bar**: Display the default account, feature status icons, and the time. The status icons display when features are activated.
- **Line Keys**: Display the information associated with the line and feature keys on the phone.
- **Page Icons**: The page icons appear only when you assign functionality to line key located in line key 11-27 on the SIP-T46S/T46G IP phone, line key 7-15 on the SIP-T42S/T42G/T41S/T41P IP phone.
- **Soft Keys**: Each soft key label indicates the action for the soft key below the screen.
- **More Key**: Tap to display more line keys on the SIP-T48S/T48G IP phone.
- **Shortcut and Main Menu**: Tap to access the shortcut or enter the main menu.

**Related Topics**

- Icons in the Status Bar
- Changing the Default Account
- Customizing the Soft Keys

**Dialing/Pre-dialing Screen**

When the phone is idle, you can pick up the handset, press a line key, Speakerphone key or HEADSET key (if configured by your system administrator) to access the Dialing screen. Or you can enter a number directly using the keypad to access the Pre-dialing screen. The placed call records display on the LCD screen. From Dialing/Pre-dialing screen, you can use phone keypad to enter and edit data. The contacts whose name or phone number matches the entered characters appear on the LCD screen. You can select the desired contact to place a call directly.

**Note**

Your system administrator can configure search source list in dialing, and disable the phone to display the placed call records. Check with your system administrator to find out if they are available on your phone.

The Dialing screen on the SIP-T48S/T48G IP phone is shown as below:

The Dialing screen on the SIP-T46S/T46G IP phone is shown as below:
Calls Screen

All of your active and held calls display on the Calls screen. You can press up or down navigation keys to switch among calls.

On the SIP-T48S/T48G IP phone, you can tap the call status bar to switch among calls. The call status bar displays call status, contact name/number and call duration. When there is an active call and a held call, the Calls screen on the SIP-T48S/T48G IP phone is shown as below:

![Calls Screen](image1)

On other IP phones, when there is an active call and a held call, the Calls screen on the IP phone is shown as below:

![Calls Screen](image2)

Icons in the Status Bar

Icons in the status bar vary by phone models.

**Entering Characters on**

**T46S/T46G/T42S/T42G/T41S/T41P/T40P/T40G**

For SIP-T46S/T46G/T42S/T42G/T41S/T41P/T40P/T40G IP phones, you can use the keypad keys on your phone to enter or update field information. The following table describes how to enter different characters using the keypad keys.
### Switch input mode
Press the **ABC, abc, Abc, 2aB, or 123** soft key to switch the input mode.

### Enter alphas
Select **ABC, abc, 2aB** or **Abc** mode. On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, press the keys labeled with letters until your desired letter appears. On the SIP-T46S/T46G IP phone, press a keypad key repeatedly to view the character options and stop when the letter you want to enter is displayed in the field. Wait one second, and then enter the next letter.

### Enter numbers
Select **123** mode, press the corresponding keys.

### Enter special characters
Select **ABC, abc, 2aB, or Abc** mode, press * key or # key one or more times to enter one of the following special characters:

* Key: *, ?, !, @, /, :, ;, +, &,
* Key: #,

In **123** mode, you can press * key to choose the following special characters: *#/@[].

### Insert space
Select **ABC, abc, 2aB, or Abc** mode, press the **0** key.

### Move cursor
Press the **4** or **1** to position the cursor.

### Delete one or more characters
Position the cursor to the right of the character, and press the **Delete** soft key.

### Entering Characters on T48S/T48G
SIP-T48S/T48G IP phone provides onscreen keyboard, phone keypad and dial pad to enter data. Keypad and dial pad provides standard key layout, which enables users to use existing or familiar key positions. You can enter characters using the onscreen keyboard, phone keypad or dial pad.

### Topics
- Using the Onscreen Keyboard

### Using the Onscreen Keyboard

#### Procedure

1. Tap the field you want to edit, the onscreen keyboard displays on the touch screen.
2. Enter the information. Do the following:

<table>
<thead>
<tr>
<th>Task</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter uppercase (A) characters, lowercase (a) characters, or a combination of uppercase and lowercase characters.</td>
<td>1. If a keyboard with characters does not display, tap <strong>abc</strong>. 2. Tap <strong>↑</strong> to toggle between entering characters in uppercase/lowercase mode. 3. Tap the character(s) you want to enter.</td>
</tr>
<tr>
<td>Enter numbers.</td>
<td>1. If a keyboard with numbers does not display, tap <strong>123</strong>. 2. Tap the number(s) you want to enter.</td>
</tr>
<tr>
<td>Enter special characters.</td>
<td>1. If a keyboard with special characters does not display, tap <strong>123</strong>. 2. Tap the special character(s) you want to enter.</td>
</tr>
<tr>
<td>Position the cursor.</td>
<td>• Tap <strong>←</strong> or <strong>→</strong> to position the cursor. • Tap to position.</td>
</tr>
<tr>
<td>Task</td>
<td>Action</td>
</tr>
<tr>
<td>----------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| Confirm the settings/Go to the next field. | • If there is only one field or the field you are editing is the last one of the configuration, tap ![Prev](Prev) to confirm the setting.  
• If the field you are editing is not the last one of the configuration, tap ![Next](Next) to go to the next field. |
| Delete characters one by one.     | 1. Position the cursor to the right side of the text you want to delete.  
2. Tap ![Delete](Delete) .                                                                                   |
| Delete more characters at a time. | 1. Drag your finger across the characters to highlight the characters you want to delete.  
2. Tap ![Delete](Delete) .                                                                                   |
| Replace characters.              | 1. Drag your finger across the characters to highlight the characters you want to replace.  
2. Tap the character(s) you want.                                                                           |

**Using the Phone Keypad and Dial Pad**

You can use the keypad on your phone or dial pad on the dialing screen to enter data. The phone keypad only provide digit keys, # key and * key, and the dial pad can provide digit keys and special characters.

The following displays the dial pad on dialing screen:

![Dial Pad](Dial Pad)

You can tap ![Keyboard](Keyboard) to use the onscreen keyboard.

Changing the Administrator Password

Some features on the phone can only be set from the Advanced settings. By default, you require a password to access the Advanced settings. The default administrator password is “admin”.

For security reasons, you should change the default password as soon as possible.

Procedure

1. Navigate to Menu -> Advanced -> Change Password.
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu -> Settings -> Advanced Settings -> Change Password.
2. Enter the desired value in the Old PWD, New PWD and Confirm PWD field respectively.
3. Press Save.

Wallpaper

Yealink SIP-T48S/T48G/T46S/T46G IP phones support wallpaper.

The IP phone comes with a default picture, you can change it to another built-in picture. You can also add personal pictures as wallpapers using a USB flash drive.

Note

You can also change it to any custom picture uploaded by your system administrator.

Topics

Changing Idle Screen Wallpaper
Changing Dsskey Screen Wallpaper
Adding a Wallpaper from a USB Flash Drive
Adding a Dsskey Screen Wallpaper from a USB Flash Drive
**Changing Idle Screen Wallpaper**

You can change the wallpaper displayed on your Idle screen to any built-in picture. If your system administrator has uploaded custom pictures to your phone, you can also choose a custom picture.

**Procedure**

1. Navigate to Menu -> Basic -> Display -> Wallpaper.
2. Select a desired wallpaper image.
3. Press Save.

**Changing Dsskey Screen Wallpaper**

You can change the wallpaper that is displayed when unfolding the line key list on the SIP-T48S/T48G IP phone. Tap More when the phone is idle to unfold the line key list.

**Procedure**

1. Navigate to Menu -> Basic -> Display -> Dsskey Wallpaper.
2. Select the desired wallpaper image.
3. Tap Save.

**Adding a Wallpaper from a USB Flash Drive**

When you set a picture in USB flash drive as wallpaper, the picture is added to the Wallpaper list.

The screen size varies by phone models:

- SIP-T48S/T48G IP phone screens are 7 inches (Resolution: 800x480).
- SIP-T46S/T46G IP phone screens are 4.3 inches (Resolution: 480x272).

We recommend you to add a picture less than 2.0 megapixels for T48S/T48G, 1.8 megapixels for T46S/T46G. Either the smaller or larger picture will be scaled proportionally to fit the screen.

**Before You Begin**

Make sure that the picture is in the root directory of your USB flash drive, and the USB flash drive is connected to your phone successfully.

**Procedure**
1. Press **Menu** - > **USB** - > **Browse Photo**.
2. Select a desired picture, and then press **Preview**.
3. Press **Set as**, and then select **Set as wallpaper**.
4. Press **OK**.
   The phone wallpaper will change to the selected picture.

**Adding a Dsskey Screen Wallpaper from a USB Flash Drive**

When you set a picture in USB flash drive as dsskey screen wallpaper on the SIP-T48S/T48G IP phone, the picture is added to the Wallpaper list.

The screens of SIP-T48S/T48G IP phones are 7 inches (Resolution: 800x480).

We recommend you to add a picture less than 2.0 megapixels. Either the smaller or larger picture will be scaled proportionally to fit the screen.

**Before You Begin**

Make sure that the picture is in the root directory of your USB flash drive, and the USB flash drive is connected to your phone successfully.

**Procedure**

1. Navigate to **Menu** - > **USB** - > **Browse Photo**.
2. Select a desired picture.
3. Tap **Set as**, and then select **Set as dsskey wallpaper**.
4. Tap **OK**.
   The phone dsskey wallpaper will change to the selected picture.

**Adjusting Transparency**

By default, the SIP-T48S/T48G IP phone displays line keys and status bar transparently. If you are using a custom picture with a single color or complex background as the wallpaper, it may affect the visual experience of the Idle screen display.

You can change the transparency of the line keys and status bar to make it easier to read.

**Procedure**

1. Navigate to **Menu** - > **Basic** - > **Display** - > **Transparency**.
2. Select the desired value from the pull-down list of **Transparency**.
3. Tap **Save**.
   The following figure shows an example of screen display when the transparency is set to 80%:
Screen Saver

The screen saver will automatically start when the IP phone is idle for the preset waiting time. You can stop the screen saver at any time by pressing any key. When your phone is idle again for a preset waiting time, the screen saver starts again.

By default, your screen displays a built-in picture when screen saver starts. You can set custom pictures as the screen saver uploaded by your system administrator. You can also add personal pictures on your phone using a USB flash drive.

The time & date, certain status icons (for example, auto answer, DND, a new text message), or custom information (for example, notifications or company logo) can also display on the screen saver.

**Note**
The custom information is preset by your system administrator.

The SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone only displays custom information as the screen saver.

Topics

- Changing the Waiting Time for Screen Saver
- Enabling/Disabling Time & Date and Status Icons Display

**Changing the Waiting Time for Screen Saver**

You can change the waiting time for screen saver.

**Procedure**

1. Navigate to **Menu > Basic > Display > Screensaver**.
   
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu > Settings > Basic Settings > Display > Screensaver**.

2. Select the desired waiting time from the **Wait Time** field.

3. Press **Save**.
Enabling/Disabling Time & Date and Status Icons Display
For the SIP-T48S/T48G/T46S/T46G IP phone, you can enable or disable your phone to display Time & Date and Status Icons on the screen saver.

Before You Begin
You cannot enable Time & Date and status icons display if your system administrator has set your phone to display custom information on the screen saver.

Procedure
1. Navigate to Menu > Basic > Display > Screensaver.
2. Select the desired value from the Display Clock field.
3. Press Save.
   The Time & Date and status icons displays on the screen saver, as shown below:

![Screen Saver Example](image)

Adding a Screen Saver from a USB Flash Drive
You can use a picture that is stored in your USB flash drive as the screen saver on your phone. When you set one of your pictures as the screen saver, the picture is displayed on the screen saver list.

The screen size varies by phone models:
- SIP-T48G/T48S IP phone screens are 7 inches (Resolution: 800x480).
- SIP-T46G/T46S IP phone screens are 4.3 inches (Resolution: 480x272).

We recommend you to add a picture less than 2.0 megapixels for T48G/T48S, 1.8 megapixels for T46G/T46S. Either the smaller or larger picture will be scaled proportionally to fit the screen.

Before You Begin
Make sure that the picture is in the root directory of your USB flash drive, and the USB flash drive is connected to your phone successfully.

Procedure
1. Press Menu > USB > Browse Photo.
2. Select the desired picture, and then press Preview.
3. Press Set as, and then select Set as screensaver.
4. Press OK.
Setting the Screen Saver Type
For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, you cannot set the screen saver type. The system administrator can set custom information displayed when screen saver starts.
For SIP-T48S/T48G/T46S/T46G IP phone, you can choose one of the following screen saver types:
- System
- Custom
- Server XML (shows custom information on the screensaver)

Before You Begin
If you want to set a custom picture as the screen saver, make sure that the custom picture has uploaded by your system administrator.
If you want to show custom information on the screen saver, make sure that the custom information has set by your system administrator.

Procedure
1. Navigate to Menu > Basic > Display > Screensaver.
2. Select the desired screen saver type from the Screensaver Type field.
   - If you select System.
     The IP phone will automatically set the built-in picture as the screen saver.
   - If you select Custom.
     The IP phone will automatically set the custom pictures as the screen saver, and display these pictures alternately.
   - If you select Server XML.
     The IP phone will automatically display the custom information (for example, notifications or company logo) on the screen saver.
3. Press Save.

Changing the Screen Backlight Brightness and Time
You can change the backlight brightness of the LCD screen during phone activity and inactivity. The backlight brightness automatically changes when the phone is idle for a specified time.
You can change the screen backlight brightness and time in the following settings:

Active Level: The brightness level of the LCD screen when the phone is active. Digits (1-10) represent different brightness levels. 10 is the brightest level. It is only available for the SIP-T48S/T48G/T46S/T46G IP phone.

Inactive Level: The brightness of the LCD screen when the phone is inactive. You can select a low brightness or turn off the backlight. It is only available for the SIP-T48S/T48G/T46S/T46G IP phone.

Backlight Time: The delay time to change the brightness of the LCD screen when the phone is inactive. Backlight time includes the following settings:
- Always On: Backlight is on permanently.
- Always Off: Backlight is off permanently. It is not available for the SIP-T48S/T48G/T46S/T46G IP phone.
- 15s, 30s, 1min, 2min, 5min, 10min or 30min: Backlight is changed when the phone is inactive after the designated time (in seconds).
**Procedure**

1. Navigate to Menu > Basic > Display > Backlight.
   - For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu > Settings > Basic Settings > Display > Backlight.

2. For the SIP-T48S/T48G/T46S/T46G IP phone, select the desired level from the Active Level field.

3. For the SIP-T48S/T48G/T46S/T46G IP phone, select the desired value from the Inactive Level field.

4. Select the desired time from the Backlight Time field.

5. Press Save.

**Adjusting the Screen Contrast**

You can adjust the screen contrast of the LCD screen to make it easier to read.

The intensity of screen contrast ranges from 1 to 10 and the highest intensity is 10. It is only available for the SIP-T40P/T40G IP phone.

**Procedure**

1. Navigate to Menu > Settings > Basic Settings > Display > Contrast.

2. Select the desired value from the Contrast field.

3. Press Save.

**Changing the Language**

The default language of the phone user interface is English. You can change the language for the phone user interface.

**Note**
The SIP-T48G/T46G/T42G/T41 IP phone does not support French (Canada), Portuguese (Latin) and Spanish (Latin).

**Procedure**

1. Navigate to Menu > Basic > Language.
   - For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu > Settings > Basic Settings > Language.

2. Select the desired language.

3. Press Save.

Text displayed on the phone user interface will change to the selected language.

**Time & Date**

You can set the time and date manually. The time and date format is also customizable.

**Topics**

- Setting the Time and Date Manually
- Changing the Date Format

**Setting the Time and Date Manually**

If your phone cannot obtain the time and date automatically, you can set the time and date manually.

**Procedure**
1. Navigate to **Menu > Basic > Time & Date > General > Manual Settings**.
   For the SIP-T48S/T48G IP phones, navigate to **Menu > Basic > Time & Date > General**. And then select **Manual Settings** from the pull-down list of **Type**.
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu > Settings > Basic Settings > Time & Date > Manual Settings**.

2. Enter the specific date and time in the corresponding fields.
   For the SIP-T46S/T46G IP phone, you can also press the up or down navigate key to select the desired date and time.

3. Press **Save**.
   The time and date displayed on the LCD screen will change accordingly.

### Changing the Date Format
You can customize the date by choosing among a variety of time and date formats.

The built-in date formats are listed as below:

<table>
<thead>
<tr>
<th>Date Format</th>
<th>Example (2016-09-02)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WWW MMM DD</td>
<td>Fri, Sep 02</td>
</tr>
<tr>
<td>DD-MMM-YY</td>
<td>02-Sep-16</td>
</tr>
<tr>
<td>YYYY-MM-DD</td>
<td>2016-09-02</td>
</tr>
<tr>
<td>DD/MM/YYYY</td>
<td>02/09/2016</td>
</tr>
<tr>
<td>MM/DD/YYYY</td>
<td>09/02/16</td>
</tr>
<tr>
<td>DD MMM YYYY</td>
<td>02 Sep, 2016</td>
</tr>
<tr>
<td>WWW DD MMM</td>
<td>Fri, 02 Sep</td>
</tr>
</tbody>
</table>

**Note**
Your system administrator can customize the date format.

### Procedure
1. Navigate to **Menu > Basic > Time & Date > Time & Date Format**.
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu > Settings > Basic Settings > Time & Date > Time & Date Format**.
2. Select the desired date format from the **Date Format** field.
3. Select the desired time format from the **Time Format** field.
4. Press **Save**.

### Setting a Key as Send
You can set the "#" key or "*" key to perform as a send key while dialing.

### Procedure
1. Navigate to **Menu > Features > Others > General**.
   For the SIP-T48S/T48G IP phones, navigate to **Menu > Features > General**.
Customizing Your Phone

For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu - Features - Key As Send**.

2. Select # or * from the **Key As Send** field, or select **Disabled** to disable this feature.
3. Press **Save**.

**Customizing the Soft Keys**

You can customize the function of the soft keys displayed in the bottom of the Idle screen for the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone. This feature is typically used to access frequently used functions, to create menu shortcuts to access frequently used phone settings. The soft keys perform the same functions as the hard keys.

**Caution**

We recommend that you should keep a **Menu** soft key, otherwise you may not access the phone settings.

**Procedure**

1. Navigate to **Menu - Settings - Advanced Settings - Softkey Label**.
2. Select the desired soft key, and then press **Enter**.
3. Select the desired key type from the **Type** field.
4. (Optional.) Select the desired line from the **Account ID** field.
5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. (Optional.) Enter the corresponding value in the **Value** field.
7. Press **Save**.

**Phone Lock**

Phone lock helps you to protect your phone from unauthorized use. You can lock your phone manually when you are not using it or lock it automatically after being idle for a specified time.

**Topics**

- Phone Lock Types and Waiting Time
- Setting the Phone Lock
- Locking Your Phone Manually
- Unlocking Your Phone
- Changing Your Phone Unlock PIN

**Phone Lock Types and Waiting Time**

There are three phone lock types:

- **Lock the Menu soft key**: it prevents unauthorized users from accessing the menu, changing the personal settings for your phone.
- **Lock the Function keys**: it only allows unauthorized users to use the keypad for placing a call, answering or rejecting an incoming call and ending a call.
- **Lock all keys**: it only allows unauthorized users to use the keypad for dialing emergency number or authorized numbers that set up by your administrator, answering or rejecting an incoming call and ending a call.

**Note**

The Volume key, HEADSET key and Speakerphone key are always available when you lock the phone.

You can set a waiting time to lock your phone automatically. If the waiting time is set to 0, the phone will not be automatically locked. You need to lock your phone manually.
**Setting the Phone Lock**

By default, the phone lock feature is disabled. If you want to lock your phone, you need to enable this feature. You can select to use which phone lock type and specify the waiting time to lock your phone automatically.

**Procedure**

1. Navigate to **Menu -> Basic -> Phone Lock**.
   - For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu -> Settings -> Basic Settings -> Phone Lock**.
2. Enter the desired PIN (default PIN: 123) in the **Unlock PIN** field.
3. Press **OK**.
   - For the SIP-T48S/T48G IP phone, tap **Save**.
4. Select **Enabled** from the **Lock Enable** field.
5. Select a desired type from the **Lock Type** field (except the SIP-T48S/T48G IP phone).
6. Enter the desired interval between 0 and 3600 (seconds) of automatic phone lock in the **Auto Lock** field.
7. Press **Save**.

**Related Topics**

Phone Lock Types and Waiting Time

**Locking Your Phone Manually**

If you have specified a timeout to lock your phone automatically, your phone will be locked after being idle for a specified time. You can also lock your phone manually.

**Before You Begin**

Make sure that the phone lock is enabled and you have set a phone lock type.

**Procedure**

1. Long press # key to lock your phone immediately on the Idle screen.
   - When the phone is locked, the lock icon will appear on the LCD screen.

**Related Topics**

Setting the Phone Lock

**Unlocking Your Phone**

**Procedure**

1. Press any locked key, the LCD screen prompts you to enter a unlock PIN.
   - On the SIP-T48S/T48G IP phone, press any locked key or tap the touch screen.
2. Enter the desired PIN (default: 123) in the **Unlock PIN** field.
3. Press **OK**.
   - The lock icon disappears from the LCD screen.

**Note**

If you forget the unlock PIN, you can enter the administrator password to unlock your phone, and then change the unlock PIN if allowed.
Changing Your Phone Unlock PIN

The default unlock PIN is 123. You can change your unlock PIN at any time for security reasons.

Procedure

1. Navigate to Menu -> Basic -> Change PIN.
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu -> Settings -> Basic Settings -> Change PIN.
2. Enter the desired value in the Old PIN, New PIN and Confirm PIN field respectively.
   The unlock PIN length must be within 15 digits.
3. Press Save.
Audio Settings

You can control certain audio settings on your phone, including adjusting the audio volume, setting a ring tone and key tone.

Topics
- Adjusting the Volume
- Setting the Ring Tone
- Setting the Key Tone

Adjusting the Volume

You can adjust the volume of audio during a call or when playing an audio file, and adjust the volume of phone ring-tone.

Topics
- Adjusting the Audio Volume
- Adjusting the Ringer Volume

Adjusting the Audio Volume

When you are playing an audio file (for example, call recording), choosing a ring tone or during a call, you can increase or decrease the volume of currently engaged audio devices (handset, speakerphone or headset).

Procedure
1. Press the Volume key to adjust the audio volume.

Related Topics

- Setting a Ring Tone for a Contact
- Playing a Recorded Call

Adjusting the Ringer Volume

When the phone is idle or ringing, you can increase or decrease the ringer volume. If ringer volume is adjusted to the minimum, the minimum volume icon will appear on LCD screen.

Procedure
1. Press the Volume key to adjust the ringer volume.

Note
Your system administrator can disable you to adjust the ringer volume.

Setting the Ring Tone

You can choose from a variety of ring tones to distinguish your phone from your neighbor’s. You can set distinctive ring tones for groups or contacts in your local directory, so you can identify caller when your phone rings.
You can also choose a unique ring tone for the different accounts on your phone.

The ring tones is used according to the priority: Contact ring tone > Group ring tone > Account ring tone > Phone ring tone.

**Note**

You can also choose a custom ring tone uploaded by your system administrator.

**Topics**

Setting a Ring Tone for the Phone  
Setting a Ring Tone for an Account

You can select a unique ring tone for individual account.

**Procedure**

1. Navigate to **Menu > Basic > Sound > Ring Tones**.  
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu > Settings > Basic Settings > Sound > Ring Tones**.
2. Select a desired account.
3. Select a desired ring tone.
   The ring tone is played automatically. You can press the Volume key to adjust the ringtone volume.
   If **Common** is selected, this account will use the ring tone selected for the phone.
4. Press **Save**.

**Related Topics**

Adjusting the Audio Volume
Setting a Ring Tone for a Group
You can select a unique ring tone for various groups in your local directory. This helps you quickly identify callers according to the phone rings.

By default, the **Auto** is selected, and this group will use the ring tone according to the priority: Contact ring tone > Account ring tone > Phone ring tone. If a specific ring tone is selected, this group will use the ring tone according to the priority: Contact ring tone > Group ring tone.

**Note**
You can only set a ring tone for a group that is added manually.

**Procedure**
1. Press **Directory (Dir)** or navigate to **Menu -> Directory -> Local Directory** to enter the local directory.
   - On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu -> Directory**.
2. Highlight a desired group.
   - On the SIP-T48S/T48G IP phone, tap **Setting**, and then select the desired group.
3. Press **Option**, and then select **Detail**.
   - On the SIP-T48S/T48G IP phone, tap after the group name.
4. Select a desired ring tone from the **Ring** field.
   - The ring tone is played automatically. You can press the Volume key to adjust the ringtone volume.
5. Press **Save** to accept the change.
   - On the SIP-T48S/T48G IP phone, tap **OK** to accept the change.

Setting a Ring Tone for a Contact
You can select a unique ring tone for various contacts in your directory. This helps you quickly identify callers according to the phone rings.

By default, the **Auto** is selected, and this contact uses the ring tone according to the priority: Group ring tone > Account ring tone > Phone ring tone.

**Procedure**
1. Press **Directory (Dir)** or navigate to **Menu -> Directory -> Local Directory** to enter the local directory.
   - On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu -> Directory -> All Contacts**.
2. Enter the desired contact group.
   - If the contact is not in any group, enter the **All Contacts**.
3. Highlight a desired contact, and then press **Option**. Select **Detail**.
   - On the SIP-T48S/T48G IP phone, tap after the desired contact.
4. Select a desired ring tone from the **Ring** field.
   - The ring tone is played automatically. You can press the Volume key to adjust the ringtone volume.
5. Press **Save**.

**Related Topics**
*Adjusting the Audio Volume*
Setting the Key Tone

You can set the phone to produce a sound when pressing the keypad keys. The key tone is enabled by default.

Procedure

1. Navigate to Menu -> Basic -> Sound -> Key Tone.
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu -> Settings -> Basic Settings -> Sound -> Key Tone.
2. Select the desired value from the Key Tone field.
3. Press Save.
The Yealink IP phone provides several types of phone directories, depending on the phone models and what the system administrator has set up for you.

The phone provides the following types of directories by default:

- Local Directory
- Favorites
- Blacklist
- Mobile Contacts
- Remote Phone Book

Local Directory

You can store up to 1000 contacts and 48 groups in your phone’s local directory, allowing you to edit, delete, search or simply dial a contact from the local directory.

Note

You can back up the local directory to the provisioning server. For more information, contact your system administrator.

Managing the Local Directory Contacts

You can add, edit and delete contacts group in the local directory.

Adding Contact Groups

To help organize your contacts and make them easier to find, you can add additional groups in the local directory.

Procedure

3. Enter the desired group name in the Name field. On the SIP-T48S/T48G IP phone, enter the desired group name, and then tap ✓ to accept the change.
4. Select the desired group ring tone from the Ring field.
5. Press **Save**.
   - On the SIP-T48S/T48G IP phone, tap **OK**.
   - On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, press **Add**.

**Editing Contact Groups**
You can change the group name at any time.

**Procedure**
1. Press **Directory (Dir)** or navigate to **Menu > Directory > Local Directory** to enter the local directory.
   - On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu > Directory**.
2. Highlight a desired group.
   - On the SIP-T48S/T48G IP phone, tap **Setting**, and then select the desired group.
3. Press **Option**, and then select **Detail**.
   - On the SIP-T48S/T48G IP phone, tap **after the group name.
4. Edit the group information.
5. Press **Save** to accept the change.
   - On the SIP-T48S/T48G IP phone, tap **to accept the change.

**Deleting Contact Groups**
You can delete a group from local directory at any time. Note that you cannot delete the All Contacts group.

**Procedure**
1. Press **Directory (Dir)** or **Menu > Directory > Local Directory** to enter the local directory.
   - On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu > Directory**.
2. Highlight a desired group.
   - On the SIP-T48S/T48G IP phone, tap **Setting**, and then select the desired group.
3. Press **Option**, and then select **Delete**.
   - On the SIP-T48S/T48G IP phone, tap **before the group name.
   - A confirmation message is displayed, confirming that you want to delete the group.
4. Press **OK** to delete.

**Managing the Local Directory Contacts**
You can add, edit and delete contacts in the local directory.

**Topics**
- Adding Contacts
- Editing Contacts
- Deleting Contacts

**Adding Contacts**
When you add a contact to your local directory, you can enter a unique name with up to three kinds of numbers of your choosing, including office number, mobile number or other number. You can set other information for your contact, including:

- Specify an account to use when calling this contact.
- Specify a ring tone for the contact.
• Specify a contact photo to the contact (only available on the SIP-T48S/T48G/T46S/T46G IP phone).

Procedure

1. Press Directory (Dir) or navigate to Menu -> Directory -> Local Directory to enter the local directory.
On the SIP-T48S/T48G IP phone, tap Directory or navigate to Menu -> Directory -> All Contacts.
2. Enter the desired contact group.
If the contact you want to add does not belong to any group, enter the All Contacts.
3. Press Add.
4. Enter the name and the office, mobile or other numbers in the corresponding fields.
5. Select the desired account from the Account field.
6. Select the desired ring tone from the Ring field.
7. On the SIP-T48S/T48G/T46S/T46G IP phone, select a desired photo from the Photo field.
8. Press Save.
On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, press Add.
If the contact already exists in the local directory, the LCD screen will prompt "Contact name existed!".

Deleting a Contact

Procedure

1. Press Directory (Dir) or navigate to Menu -> Directory -> Local Directory to enter the local directory. On the SIP-T48S/T48G IP phone, tap Directory or navigate to Menu -> Directory -> All Contacts.
2. Enter the desired contact group.
   If the contact is not in any group, enter the All Contacts.
3. Highlight a desired contact, and then press Option.
   On the SIP-T48S/T48G IP phone, tap after the desired contact.
4. Select Delete.
   On the SIP-T48S/T48G IP phone, tap Delete.
   A confirmation message is displayed, confirming that you want to delete the contact.
5. Press OK to delete.

Deleting All Contacts

Procedure

1. Press Directory (Dir) or navigate to Menu -> Directory -> Local Directory to enter the local directory.
   On the SIP-T48S/T48G IP phone, tap Directory or navigate to Menu -> Directory -> All Contacts.
2. Enter the desired contact group.
3. Press Option, and then select Delete All.
   On the SIP-T48S/T48G IP phone, tap Setting, and then tap the checkbox of Select All. Tap Delete.
   A confirmation message is displayed, confirming that you want to delete all contacts.
4. Press OK to delete.

Moving a Local Directory Contact to Blacklist

You can move a contact in the local directory to blacklist. Incoming calls from this contact will be rejected automatically.

Procedure

1. Press Directory (Dir) or navigate to Menu -> Directory -> Local Directory to enter the local directory.
   On the SIP-T48S/T48G IP phone, tap Directory or navigate to Menu -> Directory -> All Contacts.
2. Enter the desired contact group.
3. Highlight a desired contact, and then press Option.
   On the SIP-T48S/T48G IP phone, tap after the desired contact.
4. Select Add to Blacklist.
   On the SIP-T48S/T48G IP phone, tap Blacklist.
   A confirmation message is displayed, confirming that you want to move to blacklist.
5. Press OK.

Searching for Local Directory Contacts

In the Local Directory, you can enter search criteria to find your desired contact quickly.

Procedure
1. Press **Directory (Dir)** or navigate to **Menu -> Directory -> Local Directory** to enter the local directory.
   On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu -> Directory -> All Contacts**.

2. Press **Search**.

3. Enter a few continuous characters of the contact name or continuous numbers of the contact number (office, mobile or other number).
   The contacts whose name or phone number matches the entered characters will display in the result list.

**Favorites**

Favorites are the contacts in your local directory that you call most often. You can add contacts as favorites, view favorites, reorder favorites, and delete favorites. This feature is disabled by default. Check with your system administrator to find out if this feature is available on the phone.

The phone will automatically assign a Speed Dial key for a favorite from the first unused DSS key. If a DSS key is used, the IP phone will skip to the next unused DSS key. Favorites display consecutively according to their index numbers. The contact with the lowest number is displayed first. The contact name is displayed on the phone as a label.

You can quickly dial a number using the speed dial key. The order of speed dial number is office number>mobile number>other number.

<table>
<thead>

**Adding a Favorite from Local Directory**

You can add contacts as favorites from the local directory.

**Procedure**

1. Press **Directory (Dir)** or navigate to **Menu -> Directory -> Local Directory** to enter the local directory.
   On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu -> Directory -> All Contacts**.

2. Enter the desired contact group.
   If the contact you want to add does not belong to any group, enter the **All Contacts**.

3. Highlight a desired contact, and then press **Option**.
   On the SIP-T48S/T48G IP phone, tap  after the desired entry.

4. Select **Copy to Favorites**.
On the SIP-T48S/T48G IP phone, tap **Favorite**. A notification is displayed asking if you want to automatically accept the next available index number (the current maximum index plus 10) or manually enter your own.

5. Press **OK** to automatically accept an index number or press **Edit** to enter an index number (1-999999999). On the SIP-T48S/T48G IP phone, tap **OK** automatically accept an index number. Or tap **Cancel**, and then enter an index number (1-999999999) in the **Favorites Index** field.

If the favorite index of contact already exists, the LCD screen will prompt “Favorites Index already exist!”. The contact added to the Favorites directory also exists in the local directory.

### Related Topics

**Favorites**

**Adding a Favorite while Adding a Contact**

You can add a contact as a favorite by designating an index number while adding a contact.

#### Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.

   On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu->Directory->All Contacts**.

2. Enter the desired contact group.

   If the contact you want to add does not belong to any group, enter the **All Contacts**.

3. Press **Add**.

4. Enter the contact information.

5. Enter the desired favorite index (1-999999999) in the **Favorites Index** field.

6. Press **Save**.

   On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, press **Add**.

If the contact already exists in the local directory, the LCD screen will prompt “Contact name existed!” if the favorite index of contact already exists, the LCD screen will prompt “Favorites Index already exist!”.

The contact exists in the Favorites directory and local directory both.

#### Tip

You can long press a desired line key to enter the Add Contact screen to add a favorite. Check with your system administrator to find out if this feature is available on your phone.

Switching Among the Handset, Speakerphone and Headset Modes

You can select the desired mode before placing a call, or can alternate among Speakerphone, Headset, and Handset modes during a call.

You can switch the audio output mode of a phone.

- **Switching to handset mode**
  Pick up the handset to switch to the handset mode.

- **Switching to speakerphone (hands-free) mode**
  Press the Speakerphone key to switch to the speakerphone (hands-free) mode. The LED indicator glows green when the speakerphone is activated.
  The SIP-T40P/T40G IP phone does not have key light.

- **Switching to headset mode**
  Press the HEADSET key to switch to the headset mode. The LED indicator glows green when the headset is activated.
  The SIP-T40P/T40G IP phone does not have key light.

**Note**
Your system administrator can disable you to use handset, speakerphone (Hands-free) or headset mode.

Related Topics

Headset

**Changing the Default Account**

If there are multiple accounts registered on the phone, the phone will use the default account to dial out by default.
From the Idle screen, you can press the left or right navigation key to select the desired account as the default account for all IP phones. For the SIP-T48S/T48G/T46S/T46G IP phone, you can also change the default account from the menu.

**Procedure**

1. Navigate to **Menu > Features > Others > Default Account**.
   For the SIP-T48S/T48G IP phone, navigate to **Menu > Features > Default Account**.
2. Select a desired account from the **Default Account** field.
3. Press **Save**.

**Related Topics**

Placing Calls

**Placing Calls**

You can use your phone like a regular phone to place calls in many ways easily.

By default, the phone uses the default account to place a call.

**Topics**

- Placing a Call from the Dialer

- Placing an International Call
- Placing a Call from the Call History
- Placing a Call from the Directory
- Placing an Anonymous Call

**Placing a Call from the Dialer**

The Dialer enables you to enter a number to place a call and display a list of previously placed calls or similar numbers in your directory. You can also select a desired contact from the search list, or select a contact from the placed call list or Directory before you enter the number. On the SIP-T48S/T48G IP phone, you can select a desired contact from the left sidebar, or select a contact from the Directory or History.

Use your phone just like any other phone to make a call.

**Note**

Your system administrator can configure the source list for searching and disable to display the placed call records. Check with your system administrator to find out if they are available on your phone.

**Procedure**

1. Do one of the following:
   - Start typing a phone number.
   - Press a desired line key.
   - Pick up the handset, press the Speakerphone key or the HEADSET key.
2. Enter a number or select a contact.
3. Press the OK key or Send.

**Note**
Your system administrator can enable live keypad feature, which enables your phone to automatically dial out the phone number after a period of time without pressing the Send soft key. Check with your system administrator to find out if this feature is available on your phone.

Redialing a Number
The phone keeps a record of all the placed calls. You can call the recent dialed phone number.

Procedure
1. Press the REDIAL key.
   A record of Placed Calls displays on the phone screen.
2. Select the desired record, press Send.

Tip
Press the REDIAL key twice to call the last dialed number.

Dialing a Hotline Number
You can configure a hotline number and hotline delay. Then the IP phone will dial out the hotline number automatically after the delay time when you lift the handset, press the Speakerphone key or the line key.

Topics
Setting a Hotline Number and Delay Time

Setting a Hotline Number and Delay Time

Procedure
1. Navigate to Menu -> Features -> Others -> Hot Line.
   On the SIP-T48S/T48G/T42S/T42G/T41S/T41P/T40G/T40P IP phone, navigate to Menu -> Features -> Hot Line.
2. Enter the desired number in the Hotline Number field.
3. Enter the desired delay time between 0 and 10 (seconds) in the Hotline Delay field.
4. Press Save.

Placing an International Call
You can place an international call when you prefix the phone number with a plus sign (+).

Procedure
1. Pick up the phone.
2. Press 123 to switch the input mode from 123 to abc.
3. Press star key (*) repeatedly until the plus sign (+) appears.
4. Press abc three times to switch the input mode from abc to 123.
5. Enter the phone number.
6. Press Send.

**Placing a Call from the Call History**

You can place calls to the contact from the Call History list. The Call History list contains missed calls, placed calls, received calls, and forwarded calls.

**Procedure**

1. Press History.
   The phone screen displays all call records.
2. Select a desired call list.
3. Select a desired call record, and press Send.
   On the SIP-T48S/T48G IP phone, tap the desired contact.

**Placing a Call from the Directory**

You can search or call contacts in your phone directories.

**Procedure**

1. Press Directory (Dir) or navigate to Menu -> Directory.
2. Select the desired directory and contact group.
3. Select a desired contact, and press Send.
   On the SIP-T48S/T48G IP phone, tap the desired contact.
   If the selected contact has multiple numbers, select a desired number, and press Send.

Switching Among the Handset, Speakerphone and Headset Modes

Answering a Call When in a Call
When you are in an active call and an incoming call arrives on the phone, the call waiting tone beeps, and the incoming call information is displayed.

Before You Begin
Enable call waiting feature on the phone.

Procedure
1. Press the Answer soft key.
   The active call is placed on hold, and the incoming call becomes active.
Related Topics

Enabling Call Waiting

**Enabling Call Waiting**

Call waiting enables you to receive another call when there is already an active call on your phone. If it is disabled, the new incoming call will be rejected automatically.

You can enable call waiting feature to avoid missing important calls during a call. You can also set the phone to play a warning tone when the new incoming call arrives.

**Before You Begin**

Check with your system administrator if the call waiting on code or off code is required. If required, get it from your system administrator.

**Procedure**

1. Navigate to **Menu > Features > Call Waiting**.
2. Select **Enabled** from the **Call Waiting** field.
   
   For the SIP-T48S/T48G IP phone, tap the **On** radio box of the **Call Waiting** field.
3. Select **Enabled** from the **Play Tone** field.
   
   For the SIP-T48S/T48G IP phone, tap the **On** radio box of the **Play Tone** field.
4. (Optional.) Enter the call waiting on code or off code respectively in the **On Code** or **Off Code** field.
5. Press **Save**.

**Answering Calls Automatically**

Auto answer enables you to automatically answer an incoming call in speakerphone (hands-free) mode when your phone is idle.

**Note**

When you are in an active call and an incoming call arrives on the phone, the incoming call will not be automatically answered even if auto answer is enabled.

Your system administrator can configure the phone to automatically answer the incoming call after ending all calls. Check with your system administrator to find out if it is available on your phone.

**Procedure**

1. Navigate to **Menu > Features > Auto Answer**.
2. Select a desired line.
3. Select **Enabled** from the **Auto Answer** field.
   
   For the SIP-T48S/T48G IP phone, tap the **On** radio box of the desired line.
   
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, select **Enabled** from the **Status** field.
4. Press **Save**.
   
   If the auto answer feature is enabled for the default account, the auto answer icon appears on the phone screen.

Rejecting Anonymous Calls Automatically

Silencing a Call
You can silence a call to stop your phone from ringing. Even if you silence the call, the incoming call notification continues to display on your phone.

Procedure
1. Press Silence.

Rejecting a Call Manually

Procedure
1. Press Reject to reject an incoming call.

Rejecting Anonymous Calls Automatically
You can set your phone to automatically reject incoming calls from callers who have concealed their caller ID information (including name or phone number). Your phone does not ring, and you are not notified of an attempted call.

Before You Begin
Check with your system administrator if the anonymous call rejection on code or off code is required. If required, get it from your system administrator.

Procedure
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu -> Features -> Anonymous Call.
2. Select a desired line.
   For the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, select a desired line from the Line ID field.
3. Select Enabled from the Local Anony Reject (Local Anonymous Rejection) field.
   For the SIP-T48S/T48G IP phone, tap the On radio box of the Local Anony Reject field.
4. (Optional.) Select the desired value from the **Send Rejection Code** field.

5. (Optional.) Enter the anonymous call rejection on code and off code respectively in the **On Code** and **Off Code** field.

6. Press **Save**.

When the caller has anonymous call feature enabled and places a call to your IP phone, the call is automatically rejected.

**Related Topics**

**Ending Calls**

**Procedure**

1. Do one of the following:
   - If you are using the handset, press the Cancel key, **End Call** (EndCall) or hang up the handset.
   - If you are using the headset, press the Cancel key or **End Call** (EndCall).
   - If you are using the speakerphone, press the Cancel key, Speakerphone key or **End Call** (EndCall).

   **Tip**

   You can press the HEADSET key to end calls. Check with your system administrator to find out if it is available on your phone.

**Auto Redial**

Auto Redial enables you to redial a phone number automatically when the callee is busy.

**Topics**

*Setting the Auto Redial*

*Redialing a Call Automatically*

**Setting the Auto Redial**

You can enable auto redial, set the number of auto redial attempts and the time to wait between redial attempts.

**Procedure**

1. Navigate to **Menu** > **Features** > **Others** > **Auto Redial**.
   - For T48S/T48G/T42S/T42G/T41S/T41P/T40P/T40G, navigate to **Menu** > **Features** > **Auto Redial**.
2. Select **Enabled** from the **Auto Redial** field.
   - For the SIP-T48S/T48G IP phone, tap the **On** radio box of the **Auto Redial** field.
3. Enter the desired time (between 1 and 300 seconds) in the **Redial Interval** field.
4. Enter the desired times (between 1 and 300) in the **Redial Times** field.
5. Press **Save**.

**Redialing a Call Automatically**

**Before You Begin**

Enable auto redial feature on the phone.
Procedure

When the callee is busy, the phone screen prompts whether to auto redial the contact, press **OK**.

1. The phone screen displays the redial times and interval, press **OK**.

2. Wait for the designated period of time or press **OK** to redial the phone number immediately.
   The phone will retry as many times as configured until the callee answers the call.

Setting the Auto Redial

Call Mute

You can mute the microphone of the active audio device during an active call so that the other party cannot hear you.

Call mute applies to all modes (Handset, Headset and Speakerphone).

Topics

Muting/Unmuting Audio

Keep Mute

Muting/Unmuting Audio

When you are in a call, you can mute the audio, so that you can hear the other person, but he/she cannot hear you.

Procedure

1. Press the MUTE key during a call.
   The mute key LED glows red on all IP phones except the SIP-T40P/T40G IP phone.
2. Press the MUTE key again to unmute the call.
The mute key LED goes out on all IP phones except the SIP-T40P/T40G IP phone.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>You can also mute the microphone while phone is dialing or ringing, so that the other party cannot hear you when the call is set up.</td>
</tr>
</tbody>
</table>

**Keep Mute**

In a call center or meet room, if incoming calls are answered automatically, the callers may hear your discussion with your colleagues. You can mute the phone in an idle state to prevent the unintended situation. The mute state of your phone persists across calls. The phone stays in the mute state until you unmute the microphone manually or until the phone restarts.

**Before You Begin**

Check with your system administrator if keep mute is configured on your phone.

**Procedure**

1. Press the MUTE key when the phone is idle.
   
   The mute key LED glows red except on the SIP-T40P/T40G IP phone, and the mute icon appears on the Idle screen except the SIP-T42S/T42G/T41S/T41P IP phone.

2. Press the MUTE key again to deactivate the mute state.

**Call Hold**

You can place an active call on hold and resume the call when you are ready. When you place a call on hold, your IP PBX may play music to the other party while waiting.

**Topics**

- Holding a Call
- Resuming a Held Call
- Swapping Between Active and Held Calls

**Holding a Call**

**Procedure**

1. Press the HOLD key or Hold during a call.
   
   The LCD screen indicates that the call is on hold.
The phone ignores engaged audio device (handset or headset) and plays beep in the Speakerphone (hands-free) mode by default. The Speakerphone key will light up for 1 second along with the beep except on the SIP-T40P/T40G IP phone.

Note
The phone plays beep of a specified frequency softly to remind you that you still have a call on hold. Your system administrator can customize the frequency and configure when to play beep.

Resuming a Held Call

Procedure
1. Press the HOLD key again, corresponding line key or Resume.
   If multiple calls are placed on hold, select the desired call first.

Swapping Between Active and Held Calls
You can easily switch between active and held calls.

Procedure
Do one of the following to swap the active and held calls:

- If the call is active, press the Swap soft key.
- If the call is held, press the corresponding line key to swap to the active call.

Do Not Disturb (DND)
DND enables your phone to reject all incoming calls automatically when you do not want to be interrupted. You can enable DND globally on the phone or enable DND for specific lines.

If you want to receive specific numbers when DND is enabled, you can ask your system administrator to set DND Authorized Numbers.

Note
Check with your system administrator to find out if the DND feature is available on your phone.

Topics
Rejecting Calls with DND on All Lines
Rejecting Calls with DND on Specific Lines
Deactivating DND
Rejecting Calls with DND on All Lines
You can activate DND for all the lines on your phone. The phone will reject all incoming calls automatically.

Note
If both DND and busy forward are activated on the phone, calls will be forwarded to the configured destination number.

Procedure
1. Navigate to Menu -> Features -> DND.
2. Select Enabled from the DND Status field.
   On the SIP-T48S/T48G IP phone, tap On radio box of the DND Status field.
3. Press Save.
   The DND icon appears in the status bar.

Tip
To activate or deactivate DND quickly, press the DND soft key when the phone is idle.

Rejecting Calls with DND on Specific Lines
By default, the DND feature applies to all lines on your phone. Your system administrator can change the DND mode to Custom so that you can enable DND for specific lines.

Before You Begin
The DND mode is set to Custom. Check with your system administrator if the DND on code or off code is required. If required, get it from your system administrator.

Procedure
1. Press DND when the phone is idle.
2. Select a desired line, and then press Enter.
3. Set DND Status to On.
   On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, select Enabled from the DND Status field.
4. (Optional.) Enter the DND on code or off code respectively in the **On Code** or **Off Code** field.

5. Press **Save**.
   
The DND icon appears on the desired line. If you activate DND on the default line, the DND icon will appear both on the line and in the status bar.

<table>

**Redirecting Incoming Calls**

You can redirect incoming calls by forwarding all incoming calls to a contact, forwarding an incoming call manually, forwarding incoming calls with a forward key or diverting calls from a specific contact to another contact.

**Topics**

Forwarding Calls
Diverting Calls to a Contact

**Forwarding Calls**

You can forward calls from any line on your phone to a contact. There are two ways of forwarding your calls:

- Forwarding calls in special situations, such as when the phone is busy or there is no answer, or forwarding all incoming calls to a contact immediately.
  
  If you want to receive specific numbers when Forward is activated, you can ask your system administrator to set Forward Authorized Numbers.
- Manually forwarding an incoming call to a number.

**Topics**

**Forwarding All Incoming Calls to a Contact**

**Forwarding an Incoming Call Manually**

**Forwarding Incoming Calls with a Forward Key**

**Forwarding All Incoming Calls to a Contact**

You can set up your phone to forward all incoming calls to a contact with one of the following types:

- **Always Forward**: Forwards all incoming calls immediately.
- **Busy Forward**: Forwards incoming calls when you are busy in a call.
- **No Answer Forward**: Forwards incoming calls when no one answers the calls.

**Topics**

**Forwarding All Incoming Calls on All Lines**

**Forwarding All Incoming Calls on Specific Lines**

**Deactivating Call Forward**

**Forwarding All Incoming Calls on All Lines**

**Before You Begin**

Check with your system administrator if the forward on code or off code is required. If required, get it from your system administrator.

**Procedure**

1. Navigate to **Menu > Features > Call Forward**.
2. Select a desired forwarding type and select **Enabled** from the corresponding field.
   - For the SIP-T48S/T48G IP phone, tap the On radio box of the corresponding field.
3. Do one of the following:
   - Enter the contact number you want to forward incoming calls to in the **Forward to** field.
   - For the SIP-T46S/T46G IP phone, highlight the **Forward to** field. Press Directory (Dir), and then select a desired contact from the Directory list(s).
   - For the SIP-T48S/T48G IP phone, tap 2, and then tap the desired contact.
4. If you select the **No Answer Forward** option, select the desired ring time to wait before forwarding from the **After Ring Time** field.
5. (Optional.) Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.
6. Press **Save**.
   - The call forward icon on the Idle screen indicates that the call forward is activated.

**Tip**

When the phone is idle, you can press a Forward key to activate always forward feature to a specific contact.

**Forwarding All Incoming Calls on Specific Lines**

By default, the forward setting applies to all lines on your phone. Your system administrator can change the forward mode to Custom so that you can set Forward setting for specific lines.

**Before You Begin**
The call forward mode is set to Custom. Check with your system administrator if the forward on code or off code is required. If required, get the forward on code or off code from your system administrator.

**Procedure**

1. Navigate to **Menu -> Features -> Call Forward**.
2. Select a desired line.
3. Select a desired forwarding type and select **Enabled** from the corresponding field.
   For the SIP-T48S/T48G IP phone, tap the **On** radio box of the corresponding field.
4. Do one of the following:
   - Enter the contact number you want to forward incoming calls to in the **Forward to** field.
   - For the SIP-T46S/T46G IP phone, highlight the **Forward to** field. Press Directory (Dir), and then select a desired contact from the Directory list(s).
   For the SIP-T48S/T48G IP phone, tap , and then tap the desired contact.
5. If you select the **No Answer Forward** option, select the desired ring time to wait before forwarding from the **After Ring Time** field.
6. (Optional.) Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.
7. Press **Save**.
   The forward icon appears on the desired line. If you activate forward on the default line, the forward icon will appear both on the line and in the status bar.

**Tip**

You can press the **All Lines** soft key to activate forward for all lines.

Deactivating Call Forward
You can deactivate call forward when you no longer want to forward your calls.

**Procedure**

1. Navigate to **Menu -> Features -> Call Forward**.
2. If the forward is activated for specific lines, select a desired line.
3. Select the desired forwarding type and select **Disabled** from the corresponding field.
   For T48S/T48G, tap the **Off** for the desired forwarding type.
4. Press the **Save** soft key.

**Tip**

You can press the **All Lines** soft key to deactivate forward for all lines when deactivating it for a specific line.

Forwarding an Incoming Call Manually
You can manually forward the call to another contact while your phone rings.

**Procedure**

1. When the phone is ringing, press **Forward**.
2. Enter the number you want to forward the incoming call to.
3. Press the OK key or **Send**.
   On the T48S/T48G IP phone, tap **Forward**.
   The LCD screen prompts a call forward message.
**Forwarding Incoming Calls with a Forward Key**

By default, when the phone receives an incoming call, you can easily press the Forward key to forward the incoming call to a specific contact. When the phone is idle, you can also press the Forward key to activate always forward feature to forward incoming calls to a specific contact.

**Topics**

*Setting a Forward Key*
*Forwarding Incoming Calls Using a Forward Key*

**Setting a Forward Key**

You can set a line key as a Forward key, and specify a contact you want to forward the incoming calls to for this key.

**Procedure**

1. Navigate to **Menu - Features - DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Forward (FWD)** from the **Key Type** field.
5. Do one of the following:
   - (Optional.) Enter the string that will display on the LCD screen in the **Label** field. Enter the contact number you want to forward the incoming calls to in the **Value** field.
   - For the SIP-T46S/T46G IP phone, highlight the **Label** or **Value** field. Press **Directory (Dir)** and then select a desired contact from the Directory list(s).
   - For the SIP-T48S/T48G IP phone, tap , and then tap the desired contact.
6. Press **Save**.

**Forwarding Incoming Calls Using a Forward Key**

**Before You Begin**

You need to set a Forward key with a specific contact. Make sure your system administrator has set the forward mode to Phone.

**Procedure**

1. Do the following:
   - When the phone is idle, press the forward key to activate the always forward feature.
     The LCD screen prompts you the Always Forward feature is activated and the contact number that all incoming call will forward to.
   - When the phone is ringing, press the forward key to quickly forward the call to the specific contact.

**Tip**

If the forward feature is activated, you can press another Forward key to switch the target contact number when the phone is idle.

**Diverting Calls to a Contact**

You can divert all incoming calls from a particular contact to another contact. Auto divert has precedence over call forward.
Procedure

1. Press **Directory (Dir)** or navigate to **Menu -> Directory -> Local Directory** to enter the local directory.
   On the SIP-T48S/T48G IP phone, tap **Directory** or navigate to **Menu -> Directory -> All Contacts**.
2. Enter the desired contact group.
   If the contact is not in any group, enter the **All Contacts**.
3. Highlight a desired contact, and then press **Option**. Select **Detail**.
   On the SIP-T48S/T48G IP phone, tap **( )** after the desired contact.
4. Edit the contact information.
   On the SIP-T48S/T48G IP phone, you can tap **<** or **>** to switch the contact you want to edit.
5. Enter a contact’s number you want to divert the call to in the **Auto Divert** field.
6. Press **Save**.

Transferring Calls

During a call, you can transfer the call to another contact in one of three ways:

- **Blind Transfer**: Transfer a call directly to the third party without consulting.
- **Semi-Attended Transfer**: Transfer a call when receiving ringback.
- **Attended Transfer (Consultative Transfer)**: Transfer a call with prior consulting.

Topics

Performing a Blind Transfer
Performing a Semi-Attended/Attended Transfer
Performing Transfer to an Existing Call
Performing Transfer with a Transfer Key

Performing a Blind Transfer

You can transfer a call to another contact immediately without consulting with her/him first.

Procedure

1. Press the TRANSFER key or **Transfer (Trans)** during a call.
2. On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phones, select **New Call** first.
3. Do one of the following:
   - Enter the number or select a contact from the placed call list you want to transfer to.
   - If you have set a Speed Dial key, you can also press the Speed Dial key to transfer the call to the contact directly.
   - Press **Directory (Dir)**. Select a desired contact from the Directory list(s).
     On the SIP-T48S/T48G IP phone, tap the **Directory** or **History**. Tap the desired contact.
4. Press **B Transfer (B Trans)** or the TRANSFER key to complete the transfer.

Tip

If you are using a handset, the transfer can be completed by hanging up the handset.
Performing a Semi-Attended/Attended Transfer
You can transfer a call to another contact immediately when receiving ringback or after consulting with her/him first.

Procedure
1. Press the TRANSFER key or Transfer (Trans) during a call.
2. Do one of the following:
   - Enter the number or select a contact from the placed call list you want to transfer the call to.
   - Press Directory (Dir). Select a desired contact from the Directory list(s).
     On the SIP-T48S/T48G IP phone, tap the Directory or History. Tap the desired contact.
3. Press the OK key or Send.
4. Do one of the following:
   - When you hear the ringback tone, press the TRANSFER key or Transfer (Trans) to finish a semi-attended transfer.
   - After the contact answers the call, press the TRANSFER key or Transfer (Trans) to finish an attended transfer.

Tip
If you are using a handset, the transfer can be completed by hanging up the handset.

Setting a Transfer Key
You can set a line key as a Transfer key, and specify a contact you want to transfer a call to for this key.

Procedure
1. Navigate to Menu > Features > DSS Keys, and then select a desired line key.
2. Select Key Event from the Type field.
3. Select Transfer (Trans) from the Key Type field.
4. Do one of the following:
   - (Optional.) Enter the string that will display on the LCD screen in the Label field.
     Enter the contact number you want to transfer the call to in the Value field.
   - For the SIP-T46S/T46G IP phone, highlight the Label or Value field. Press Directory (Dir) and then select a desired contact from the Directory list(s).
     For the SIP-T48S/T48G IP phone, tap and then tap the desired contact.
5. Press Save.

Tip
By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Performing a Blind Transfer Using a Transfer Key

Before You Begin
You need to set a Transfer key with a specific contact. By default, your system administrator has set your phone to perform blind transfer by Transfer key.

Procedure
1. Press the Transfer key during a call.
   The call is transferred to the specific contact directly.

Related Topics

Setting Up a Local Conference Call

Procedure
1. Place a call to the first party.
2. When the first party answers the call, press Conference (Conf) to place a new call.
3. Enter the number of the second party to dial out.
You can also select a desired contact from the search list, or select a contact from the placed call list or Directory before you enter the number. On the SIP-T48S/T48G IP phone, you can select a desired contact from the left sidebar, or select a contact from the Directory or History.

The active call is placed on hold.

4. When the second party answers the call, press Conference (Conf) again to join all parties in the conference.

Joining Two Calls in a Conference
You can select a hold call to join into a conference call with the active call.

Procedure

1. Place two or more calls using the same or different accounts on the phone.
2. Select the desired call for conference and ensure that the call is active.
3. Press Conference (Conf).
4. Select a desired hold call, and then press Send.

Joining a Transfer Target and a Transferee into a Conference
After consulting with the contact you want to transfer a call to, you can also join the two calls in a conference.

Procedure

1. Press Conference (Conf) after talking with the contact you want to transfer a call to.
   The transferee and the transfer target are joined into a conference.
Related Topics

Holding/Resuming a Conference Call
When you place a conference call on hold, both the other two participants are placed on hold. The other two participants cannot hear each other until you resume the held conference call.

Procedure
1. Press the HOLD key or Hold to place the conference on hold.
2. Press the HOLD key again or Resume to resume the held conference call.

Muting/Unmuting a Conference Call
You can mute the local microphone during a conference call so that the other two participants can hear each other except you.

Procedure
1. Press the MUTE key to mute the conference.
2. Press the MUTE key again to unmute the conference.

Splitting a Conference Call
You can split the conference call into two individual calls. After you split a conference call, the conference call ends, and the other two parties are held. You can resume one of the hold calls.

Procedure
1. Press Split.

Managing Conference Participants
You can manage conference participants in the following ways:
- Mute a participant
- Hold a participant
- Remove a participant from the conference

Procedure
On the SIP-T46S/T46G/T42S/T42G/T41S/T41P/T40P/T40G IP phone, press Manage, and then select the desired party. You can do the following:
- Press Far Mute (FarMute) to mute the party. The muted party can hear everyone, but no one can hear the muted party.
- Press Far Hold (FarHold) to hold the party. The held party cannot hear anyone, and no one can hear the held party.
- Press Remove to remove the party from the conference call.
- Press Back to return to the previous screen.

On the SIP-T48S/T48G IP phone, you can do the following:
- Tap to mute the party. The muted party can hear everyone, but no one can hear the muted party. The icon changes to .
- Tap to hold the party. The held party cannot hear anyone, and no one can hear the held party. The icon
Changes to \[11\].

- Tap \[\times\] to remove the desired party from the conference call.
  A confirmation message is displayed, confirming that you want to remove the party. Tap \[\text{OK}\] to remove the party from the conference call.

**Ending a Conference Call**

By default, the other two parties drop the call when you end the conference call. However, your system administrator can set up that the other two parties remain connected when you end the conference call.

**Procedure**

1. Press \[\text{End Call (EndCall)}\] to drop the conference call.

**Network Conference**

If your system administrator has set network conference feature on your phone, you can initiate a conference with multiple participants.

**Topics**

**Setting Up a Network Conference**

**Setting Up a Network Conference**

**Procedure**

1. Place a call to the first party.
2. Press \[\text{Conference (Conf)}\] to place a new call.
   The active call is placed on hold.
3. Enter the number of the second party, and then press the \[\text{OK}\] key or \[\text{Send}\].
4. When the second party answers the call, press \[\text{Conference (Conf)}\] to add the second party to the conference.
5. Press \[\text{Conference (Conf)}\] to place a new call.
   The conference call is placed on hold.
6. Enter the number of the new party, and then press the \[\text{OK}\] key or \[\text{Send}\].
7. When the new party answers the call, press \[\text{Conference (Conf)}\] to add the new party to the conference.
8. Repeat steps 5 to 7 until you add all parties.

**Note**

The procedures for setting up a network conference call on specific servers may be different from introduction above. Contact your system administrator for more information.

**Call Recording**

On the SIP-T48S/T48G/T46S/T46G/T42S/T41S IP phone, you can record active calls onto a USB flash drive connected to your IP phone, and the recordings are saved as *.wav files.

Recording using a USB flash drive is not available by default. Check with your system administrator to find out if this feature is available on your phone.

**Note**

For more information on how to attach a USB flash drive, please refer to the Quick Start Guide for your IP phone on your phone’s support page on Yealink Support. The size of a single recording file should be less than 2G.

Recording a Call

You can record active calls on the phone. You cannot record calls when there are no connected calls, when you place a new call, transfer a call or initiate a conference, or when you have an incoming call.

Important

Before call recording, especially those involving PSTN, it is necessary to know about the rules and restrictions of any governing call recording in the country where you are.
It is also very important to inform all the call parties that you are recording and ask for their consent before recording the conversation.

Procedure

1. During a call, press **More** -> **Start REC**.
   
   The LCD screen displays a recording icon and recording duration.

Managing a Call While Recording

You can hold/resume, mute, transfer, place a new call or set up a conference call during recording. All calls you handle during a recording are recorded in a same file.

If your call is placed on hold, the recording is paused. It means that both you and the remote party are not recorded. If you mute the call, the muted party is not recorded.

Pausing a Recording

You can pause a recording during a call at any time. Both you and other parties are not recorded.
Procedure

1. Press More, and then press PauseREC.
   The pause recording icon appears on the LCD screen and the duration stops counting.

Resuming a Recording

You can resume a paused recording during a call.

Procedure

1. Press More, and then press ReREC.
   The recording continues within the same file.

Stopping a Recording

You can stop recording during a call. When you end a call during recording, the recording will also be stopped and saved as *.wav file in the USB flash drive automatically.

Procedure

- Press More, and then press StopREC.
  The recording icon and recording duration disappears. A message is displayed, prompting that the call is recorded successfully.
- Press More and then press End Call (EndCall).
  The recording icon and recording duration disappears, and the phone returns to the Idle screen. A prompt message is displayed, prompting that the call is recorded successfully.

Playing a Recorded Call

You can browse and play back the recorded files on your phone.

During the recording plays, you can switch among Speakerphone (hands-free) modes by pressing the speakerphone key, Handset modes by pressing the HEADSET key or Handset mode by picking up the handset.

Tip

You can also play back the recorded calls on the phone or on a computer using an application capable of playing *.wav files.

Procedure

1. Navigate to Menu -> USB -> Browse Audio.
   The LCD screen shows all recorded files (file name, duration time and file size) in the Browse Audio list. The file-name consists of the recording time & date, the other party’s number/IP address/name (or the first person’s number/IP address/name you called).
2. Select a desired file to play.
   The length of the recording and a progress bar are displayed as the recording plays.

You can press the Volume key to adjust the volume of audio output.

**Related Topics**

Switching Among the Handset, Speakerphone and Headset Modes
Adjusting the Audio Volume

**Pausing/Resuming a Recording**

When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

**Procedure**

1. Press **Pause** to pause the playback. The **Play** soft key appears on the LCD screen.
   On the SIP-T48S/T48G IP phone, tap \( \text{II} \) to pause the playback. Then \( \text{II} \) appears on the touch screen.

2. Press **Play** to resume the playback.
   On the SIP-T48S/T48G IP phone, tap \( \text{II} \).

**Fast Forwarding/Rewinding a Played Recorded Call**

While a recorded call plays, you can fast forward or rewind the playback at any time.

**Procedure**

- Press **F.Fwd** (\( \text{FF} \)) to skip forward the playback. Press once to skip forward 8 seconds.
- Press **F.Rew** (\( \text{FF} \)) to rewind the playback. Press once to rewind 8 seconds.
  On the SIP-T48S/T48G IP phone, drag the slider to skip forward the playback or rewind the playback.
**Stopping a Playback**

When you finish listening to a recording, you can stop playing by pressing the **Back** soft key. The phone returns to the Browse Audio screen. On the SIP-T48S/T48G IP phone, tap 🔄 to stop the playback.

**Deleting a Recorded Call**

You can delete the recorded calls when you need additional space on your USB drive.

**Procedure**

1. Navigate to **Menu > USB > Browse Audio**.
2. Highlight a desired recording, and then press **Delete**.
   
   On the SIP-T48S/T48G IP phone, tap 🔄 after the desired recording.
   
   A confirmation message is displayed, confirming that you want to delete the audio.
3. Press **OK** to delete.

**Viewing the Available Recording Time**

When you insert a USB flash drive to the IP phone during a call, a message will pop up to tell you how much time is available for recording.

![USB flash drive connected](image)

During a recording, if there is insufficient free space (30 minutes or 10 minutes left) on the USB flash drive, the IP phone will prompt you a message (XX minutes left for call recording). If no free space on the USB flash drive during recording, recording is stopped and saved in the USB flash drive automatically.

You can also view the storage space of the USB flash drive and check the available recording time before recording, since the insufficient free space may result in call recording failure.

**Procedure**

1. Navigate to **Menu > USB > Storage Space**.

**Multicast Paging**

Multicast Paging allows you to easily and quickly broadcast instant audio announcements to users who are listening to a specific multicast group on a specific channel.

The IP phone supports the following 31 channels:

- **0**: Broadcasts are sent to channel 0. Note that Yealink IP phones running firmware version 80 or earlier can be regarded as listening to channel 0. It is the default channel.
• **1 to 25**: Broadcasts are sent to channel 1 to 25. We recommend that you specify these channels when broadcasting with Polycom IP phones which have 25 channels you can listen to.

• **26 to 30**: Broadcasts are sent to channel 26 to 30. We recommend that you specify these channels when broadcasting with Yealink IP phones running firmware version 81 or later.

Note that all IP phones that you want to include in the multicast paging group need to be in the same network, since a broadcast is used. The IP phone can only send/receive broadcasts to/from the listened channels. Other channels’ broadcasts will be ignored automatically by the IP phone.

**Topics**

- Sending Multicast Paging
- Receiving Multicast Paging
- Managing a Paging Call

**Sending Multicast Paging**

Yealink IP phone supports up to 31 groups for paging. You can assign a label to each group to identify the phones in the group, such as All, Sales, or HR.

You can set a line key as Multicast Paging key or Paging list key on the phone, which allows you to send announcements to the phones with pre-configured multicast address(es) on specific channel(s).

**Note**

Multicast RTP is one way only from the sender to the multicast address(es) (receiver). For outgoing RTP multicasts, all other existing calls on the phone will be placed on hold.

**Topics**

- Setting a Multicast Paging Key
- Setting a Paging List Key
- Setting a Paging Group
- Deleting a Paging Group
- Sending a Paging by a Multicast Paging Key
- Sending Pages by a Paging List Key

**Setting a Multicast Paging Key**

You can set a Multicast Paging key for a paging group, which allows you to send announcements quickly on the idle screen.

**Before You Begin**

Get the multicast IP address and port number from your system administrator.

**Procedure**

1. Navigate to **Menu > Features > DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Multicast Paging** from the **Key Type** field.
5. (Optional.) Enter the paging group name in the **Label** field.
6. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the **Value** field.
7. Enter the desired channel between 0 and 30 in the **Channel** field.
8. Press **Save**.
Tip
By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Setting a Paging List Key
You can set a Paging List key to easily access the paging groups on the idle screen.

Procedure
1. Navigate to Menu -> Features -> DSS Keys.
2. Select a desired line key.
3. Select Key Event from the Type field.
4. Select Paging List from the Key Type field.
5. (Optional.) Enter the string that will display on the LCD screen in the Label field.
6. Press Save.

Tip
By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Setting a Paging Group

Before You Begin
Get the multicast IP address and port number from your system administrator.

Procedure
1. Press the paging list key when the phone is idle.
   If the paging list key is not set, you can also navigate to Menu -> Features -> Others -> Paging List for the SIP-T46S/T46G IP phone or Menu -> Features -> Paging List for other IP phones.
2. Select a desired paging group.
   The default tag is Empty if it is not configured before.
3. Press Option, and then select Edit.
   For the SIP-T48S/T48G IP phone, tap Edit.
4. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the Address field.
5. Enter the string that will display on the LCD screen in the Label field.
6. Enter the desired channel between 0 and 30 in the Channel field.
7. Press Save.
8. To set more paging groups, repeat steps 2 to 7.

Deleting a Paging Group

Procedure
1. Press the paging list key when the phone is idle.
   If the paging list key is not set, you can navigate to Menu -> Features -> Others -> Paging List on the SIP-T46S/T46G IP phone or Menu -> Features -> Paging List on other IP phones.
2. Select a desired paging group.
3. Press Option, and then select Delete.
   On the SIP-T48S/T48G IP phone, tap Delete.
A confirmation message is displayed, confirming that you want to delete the paging group.

4. Press **OK**.

**Sending a Paging by a Multicast Paging Key**

**Before You Begin**

You need to set a Multicast Paging key in advance.

**Procedure**

1. Press the Multicast Paging key when the phone is idle.
   
   Both your phone and receiver’s phone play a warning tone and the multicast RTP session will be automatically answered on the receiver’s phone in the speakerphone (hands-free) mode.
   
   On the SIP-T48S/T48G IP phone, the multicast paging key icon indicator will become \( \text{hand} \) and solid. On other IP phones, the multicast paging key LED glows green.
   
   The following figure shows a multicast RTP session on the phone:

   ![Multicast RTP Session on SIP-T48S/T48G IP Phone](image)

**Related Topics**

- Setting a Multicast Paging Key

**Sending Pages by a Paging List Key**

**Before You Begin**

You need to set a Paging List key in advance.

**Procedure**

1. Press the paging list key when the phone is idle.
2. Select a desired paging group.
3. Press **Paging** to send RTP.
   
   Both your phone and receiver’s phone play a warning tone and the multicast RTP session will be automatically answered on the receiver’s phone in the speakerphone (hands-free) mode.

**Related Topics**

- Setting a Paging List Key
**Receiving Multicast Paging**

You system administrator has set a listening paging group for you, and then you can receive a paging call when the phone is idle. The paging call is automatically answered on your phone.

When there is a voice call or a paging call in progress, or when DND is activated on your phone, the phone handles the new paging call differently which depends on multicast listening settings configured by your system administrator.

**Managing a Paging Call**

During a paging call, you can do the following:

- Press **Hold** to place the current paging call on hold. The paging call is placed on hold and receiver’s phone releases the session.
- Press **Resume** to resume the held paging call. The multicast RTP session is re-established.
- Press **End Call (EndCall)** to end the paging call.
Advanced Features

This chapter explains how to use the advanced features on the IP phone.

Topics

Call Completion
Call Pickup
Call Park and Call Retrieve
Busy Lamp Field (BLF)
BLF List
Shared Line
Intercom
Messages
Hot Desking
Automatic Call Distribution (ACD)

If you require additional information or assistance with your new phone, contact your system administrator.

Call Completion

When you place a call and the callee is temporarily unavailable to answer the call, call completion allows your phone to monitor the busy party and establish a call after the busy party becomes available to receive a call.

Note

Call completion is not available on all servers. For more information, contact your system administrator.

Topics

Enabling Call Completion
Using Call Completion

Enabling Call Completion

Procedure

1. Navigate to Menu > Features > Others > Call Completion.
   For T48S/T48G/T42S/T42G/T41S/T41P/T40P/T40G, navigate to Menu > Features > Call Completion.
2. Select Enabled from the Call Completion field.
   For the T48S/T48G IP phone, tap the On radio box of the Call Completion field.
3. Press Save.

Using Call Completion

Before You Begin

Enable call completion feature on the phone. You place a call and the callee is temporarily unavailable to answer the call.

Procedure

1. The phone screen prompts whether to wait for the callee, press OK to activate the call completion feature.
2. When the callee becomes idle, the phone screen prompts whether to dial the number, press **OK** to dial the number.

**Related Topics**

Enabling Call Completion

**Call Pickup**

You can use call pickup to answer someone else's incoming call on your phone. Check with your system administrator to find out if this feature is available on your phone.

The Yealink IP phone supports Directed Call Pickup and Group Call Pickup.

- **Directed Call Pickup:** allows you to pick up incoming calls from another phone.
- **Group Call Pickup:** allows you to pick up incoming calls to any phone within a predefined group of phones, without dialing the extension of another phone.

**Topics**

Picking up a Call Directly
Picking up a Group Call
Picking up a Call with a Directed Pickup Key
Picking up a Call with a Group Pickup Key

**Picking up a Call Directly**

You can answer a call that rings on another phone. If there are multiple incoming calls on the phone at the same time, you can only pick up the first incoming call.

**Before You Begin**
The target phone receives an incoming call. Your system administrator has enabled the directed call pickup and set the directed call pickup code.

**Procedure**

1. Pick up the handset, press the line key or the Speakerphone key.
   
   The **DPickup** soft key appears on the LCD screen (You may need to press the **More** soft key to see the **DPickup** soft key).

2. Press **DPickup** on your phone.
3. Enter the phone number which is receiving an incoming call.
4. Press **DPickup** again.
   
   The call is answered on your phone.

**Tip**

When the phone is idle, you can use a Directed Pickup or BLF/BLF List key to pick up a call to a specific contact directly.

**Related Topics**

- Picking up a Call with a Directed Pickup Key
- Picking up a Remote Call by BLF Key
- Picking up a Remote Call by BLF List Key

**Picking up a Group Call**

When any phone within a predefined group of phones receives an incoming call, you can pick up that call easily on your phone.

**Before You Begin**

Your system administrator has enabled the group call pickup and set the group call pickup code.

**Procedure**

1. Pick up the handset, press the line key or the Speakerphone key.
   
   The **GPickup** appears on the LCD screen.

2. Press **GPickup** on your phone when any phone in the group receives an incoming call.
   
   The call is answered on your phone.

**Tip**

When the phone is idle, you can use a Group Pickup key to pick up a group call directly.

**Related Topics**

- Picking up a Call with a Group Pickup Key

**Picking up a Call with a Directed Pickup Key**

- Directed Picking up a Call Using a Directed Pickup Key
Setting a Directed Pickup Key
You can set a line key as a Directed Pickup key, and specify a contact you want to pick up a call from for this key.

Before You Begin
Your system administrator has set the directed call pickup code.

Procedure
1. Navigate to Menu -> Features -> DSS Keys.
2. Select a desired line key.
3. Select Key Event from the Type field.
4. Select Pick Up from the Key Type field.
5. Select a desired line from the Account ID field.
6. Do one of the following:
   - (Optional.) Enter the string that will display on the LCD screen in the Label field.
   - Enter a contact number you want to pick up a call from in the Value field.
   - For the SIP-T46S/T46G IP phone, highlight the Label or Value field. Press Directory (Dir) and then select a desired contact from the Directory list(s).
   - For the SIP-T48S/T48G IP phone, tap the desired contact.
7. Press Save.

Tip
By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Directed Picking up a Call Using a Directed Pickup Key

Before You Begin
You need to set a Directed Pickup key. The target phone receives an incoming call.

Procedure
1. Press the Directed pickup key.
   The call is answered on your phone.

**Call Park and Call Retrieve**

You can use this feature to park a call, and then retrieve the call either from your phone or another phone. After you park a call, the call is placed on hold, you can continue the conversation after retrieving it.

The IP phone supports this feature under the following modes:

- **FAC mode**: park the call to the local extension or a desired extension through dialing the park code.
- **Transfer mode**: park the call to the shared parking lot through performing a blind transfer. For some servers, the system will return a specific retrieve park number (park retrieve code) from which the call can be retrieved after parking successfully.

**Note**

Call park is not available on all servers. Check with your system administrator to find out if it is available on your phone.

**Topics**
Parking or Retrieving a Call in the FAC Mode

Parking or Retrieving a Call in the FAC Mode

Your system administrator sets up the FAC mode in which you can park and retrieve a call on your phone.

Topics
Parking a Call in the FAC Mode
Retrieving a Parked Call in the FAC Mode

Parking a Call in the FAC Mode

Before You Begin

Your system administrator has set call park in the FAC mode.

Procedure

1. During a call, press Park (You may need to press the More soft key to see the Park soft key).
   The phone will dial the configured call park code.
2. Do one of the following:
   • If you want to park the call against the local extension, press the # key.
   • If you want to park the call against a desired extension, enter the extension (for example, 4606) where you want to park the call and press the # key.
   If the call is parked successfully, you will hear a voice prompt confirming that the call is parked. The call is parked against the specified extension.

Tip

You can use a Park key or a BLF key to park a call to a specific contact directly.

When the monitored line receives an incoming call, your phone LCD screen displays an incoming call to the monitored line (for example, from 1008 to 1001). You can pick up the call to monitored line, place a call to monitored line, place a new call or go back to the Idle screen.

![Calls for Pickup](image)

**Before You Begin**

If you want to pick up a remote call, check with your system administrator to make sure that the directed call pickup code is set in advance.

**Procedure**

Do one of the following:

- Press **Pick Up** to pick up the incoming call.
  The remote phone stops ringing and the call is answered on your phone. The caller ID of the party that initiated the call appears on the screen.
- Press **Send** to place a call to the monitored line.
- Press **New Call (NewCall)** to place a new call.
- Press **Cancel** to go back to the Idle screen.

**Note**

If your phone is locked, you cannot use the **Pick Up, Send, New Call (NewCall)** and **Cancel** soft keys until unlocked. For more information, refer to **Phone Lock**.
Picking up a Remote Call by BLF Key
When a monitored line receives an incoming call, you can pick up the incoming call by pressing the BLF key. For example, if the monitor user is not at his/her desk and someone rings his/her line, you can pick up the call simply by pressing the flashing BLF key.

Before picking up an incoming call, make sure that the directed call pickup code has been configured in advance.

**Topics**

Setting the Directed Call Pickup Code for BLF key
Picking up a Remote Call

Setting the Directed Call Pickup Code for BLF key
If your system administrator set the directed call pickup code in advance, you can use the BLF key to pick up the call directly. If not or if you want to set a pickup code for a specific BLF line, you can set a pickup code for BLF key manually.

**Before You Begin**

You need to set a BLF key and get the directed call pickup code from your system administrator.

**Procedure**

1. Long press the BLF key.
2. Enter the directed call pickup code in the **Extension** field.
3. Press **Save**.

Setting a BLF Key
Picking up a Remote Call

Transferring a Call by BLF Key
When there is already an active call on the IP phone, you can transfer the active call to the monitored line by pressing the BLF key.

The phone transfers (Blind Transfer or Attended Transfer) the active call differently depending on the Transfer Mode via Dsskey feature configured by your system administrator.
Topics

Performing a Blind Transfer
Performing a Semi-attended/Attended Transfer

Performing a Blind Transfer

Before You Begin
Check with your system administrator if the Transfer Mode via Dsskey is set to Blind Transfer.

Procedure
1. During a call, press the BLF key of the monitored line which you want to transfer this call to.

Performing a Semi-attended/Attended Transfer

Before You Begin
Check with your system administrator if the Transfer Mode via Dsskey is set to Attended Transfer.

Procedure
1. During a call, press the BLF key of the monitored line which you want to transfer this call to. The phone will dial out the number of the monitored line.
2. Press the BLF key of the monitored line again or Transfer (Trans) to complete the transfer when the monitored user receives ringback or after the monitored user answers the call.

Parking/Retrieving a Call by BLF Key

You can use the BLF key to park a call or retrieve a parked call directly.

Note
Check with your system administrator to find out if it is available on your phone.

Topics

Parking a Call
Retrieving a Parked Call

Parking a Call

Before You Begin
Your system administrator has set call park feature in the FAC mode in advance.

Procedure
1. During a call, press Park (You may need to press the More soft key to see the Park soft key).
2. Press the desired BLF key to park the call to the monitored line.
   On the SIP-T48S/T48G IP phone, tap to back to the Idle screen, and then tap the desired BLF key to park the call to the monitored line.

Retrieving a Parked Call

Before You Begin
Your system administrator has set call park feature in the FAC mode.

**Procedure**

1. Press **Retrieve** on the dialing screen.
2. Press the desired BLF key to retrieve a call that is parked to the monitored line.

   On the SIP-T48S/T48G IP phone, tap to back to the Idle screen, and then tap the desired BLF key to retrieve a call that is parked to the monitored line.

**BLF List**

BLF List feature enables you to monitor a list of users defined by your system administrator. For example, your system administrator has enabled BLF List feature and created a BLF List URL (for example, BLFList@example.com) with user1 and user2 in the list on the server. After configuration, the BLF List keys on the IP phone can present the status of user1 and user2, and the respective key LEDs or icons will either flash or glow depending on the status of monitored lines.

Check with your system administrator to find out if this feature is available on your phone.

### Picking up a Remote Call by BLF List Key

When a monitored line receives an incoming call, you can pick up the incoming call by pressing the BLF List key. For example, if the monitor user is not at his/her desk and someone rings his/her line, you can pick up the call simply by pressing the flashing BLF List key.

Check with your system administrator to find out if this feature is available on your phone.

**Procedure**

1. Pressing the BLF List key to pick up the call for the monitored line directly.

### Transferring a Call by BLF List Key

When there is already an active call on the IP phone, you can transfer the active call to the monitored user by pressing the BLF List key.

The phone transfers (Blind Transfer or Attended Transfer) the active call differently depending on the Transfer Mode via Dsskey feature configured by your system administrator.

**Topics**

- Performing a Blind Transfer
- Performing a Semi-attended/Attended Transfer

### Performing a Blind Transfer

**Before You Begin**

Check with your system administrator to make sure that the Transfer Mode via Dsskey is set to *Blind Transfer*.

**Procedure**

1. During a call, press the BLF List key of the monitored line which you want to transfer this call to.

### Performing a Semi-attended/Attended Transfer

**Before You Begin**

Check with your system administrator if the Transfer Mode via Dsskey is set to *Attended Transfer*.

**Procedure**

1. During a call, press the BLF List key of the monitored line which you want to transfer this call to. The phone will dial out the number of the monitored line.
2. Press the BLF List key of the monitored user again or Transfer (Trans) to complete the transfer when the monitored user receives ringback or after the monitored user answers the call.

**Retrieving a Call by BLF List Key**
You can use the BLF List key to retrieve a call which is parked to the monitored line directly.

Check with your system administrator to find out if this feature is available on your phone.

**Procedure**
1. Press the desired BLF List key to retrieve a call that is parked to the monitored line.

   On the SIP-T48S/T48G IP phone, tap to back to the Idle screen, and then tap the desired BLF key to retrieve a call that is parked to the monitored line.

   **Barging In an Active Call by BLF List Key**
   You can use the BLF List key to barge in a conversation and set up a conference call.

   Check with your system administrator to find out if this feature is available on your phone.

   **Procedure**
   1. Press the BLF List key.

      The IP phone dials out the barge-in code followed by the monitored line, and then you can join the call. Each of the three parties can hear the other two parties.

   **Shared Line**
Yealink IP phone supports Shared Call Appearance (SCA) or Bridged Line Appearance (BLA) to share a line, which can be registered on more than one IP phone at the same time.

Your system administrator can set up your phone to use shared line.

**Note**
Check with your system administrator to find out if SCA or BLA is available on your phone.

Placing a Call on Hold on a Shared Line
You can place a call on public hold or private hold. Private hold feature is not available for BLA.

Topics
Placing a Call on Public Hold
Placing a Call on Private Hold

Placing a Call on Public Hold
You can place a call on public hold that allows any shared line phone to retrieve the held call.

Procedure
1. During a call, press the HOLD key or Hold.
   
   The call is held on your phone, and all of the phones registered with shared line show the call is in held state on the shared line key.

Placing a Call on Private Hold
In SCA scenario, you can place a call on private hold that only allows you to retrieve the held call. You can hold a call privately on a shared line using the PriHold soft key preset by your system administrator. If the PriHold soft key is not available on your phone, you can also set a line key as private hold key manually.

Topics
Setting a Private Hold Key
Holding a Call Privately

Setting a Private Hold Key

Procedure
1. Navigate to Menu > Features > DSS Keys.
2. Select a desired line key.
3. Select Key Event from the Type field.
4. Select Private Hold from the Key Type field.
5. (Optional.) Enter the string that will display on the LCD screen in the Label field.
6. Press Save.

Tip
By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.
**Holding a Call Privately**

You can hold a call privately on a shared line using a **PriHold** soft key or Private Hold key.

**Before You Begin**

If **PriHold** soft key is not available on your phone, you need to set a Private Hold key in advance.

**Procedure**

1. During a call, press **PriHold** or Private Hold key on the phone (You may need to press the **More** soft key to see the **PriHold** soft key).
   
   The call is held on your phone, and the other phones registered with shared line show the call is in busy state on the shared line key. Other users on the shared line cannot resume your call.

**Related Topics**

Setting a Private Hold Key

**Retrieving a Held Call Remotely on a Shared line**

If you place a call on hold on a shared line, you can resume this call at any time. When the shared line key shows a call that is in held state, you can resume the held call remotely from other users’ phone.

**Before You Begin**

There is at least one call placed on public hold on the shared line.

**Procedure**

1. Do one of the following:
   
   - Press the line key.
     
     On the SIP-T48S/T48G IP phone, tap 📞.
   
   - In SCA scenario, long press the shared line key. On the SIP-T48S/T48G IP phone, long tap 📞.
     
     The **Cancel**, **Call Pull (CallPull)**, **New Call (NewCall)** and **Retrieve** appear on the screen. Press **Retrieve** to retrieve the call.

**Barging In an Active Call on a Shared line**

In SCA scenario, both you and other users can barge into an active call on shared line. Only one user can barge in on a call at a time. After a user barges into a call, the call becomes a three-party conference.

**Before You Begin**

There is at least one active call on the shared line.

**Procedure**

1. Long press the line key, and then select an active call.
   
   On the SIP-T48S/T48G IP phone, long tap 📞.
The **Cancel**, **Call Pull (CallPull)**, **New Call (NewCall)**, and **Barge In (Bargeln)** appear on the LCD screen.

2. Press **Barge In (Bargeln)** to interrupt the active call.

### Pulling a Shared Call on a Shared line

In SCA scenario, both you and other users can pull an existing call from another shared phone that is in active or hold state.

Check with your system administrator to find out if this feature is available for your phone.

### Before You Begin

There is an active or held call on the shared line.

### Procedure

1. Long press the line key, and then select a call.

2. Press **Call Pull (CallPull)** to pull the call.

### Intercom

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary. This enables you to place an intercom call that is answered automatically on the contact’s phone as long as the contact is not in an active call.

**Note**

Intercom is not available on all servers. Contact your system administrator for more information.

**Procedure**

1. Navigate to Menu -> Features -> DSS Keys.
2. Select a desired line key.
3. Select Intercom from the Type field.
4. Select the desired line from the Account ID field.
5. Do one of the following:
   - (Optional.) Enter the string that will display on the LCD screen in the Label field.
     Enter the target extension number in the Value field.
   - For the SIP-T46S/T46G IP phone, highlight the Label or Value field. Press Directory (Dir) and then select a desired contact from the Directory list(s).
     For the SIP-T48S/T48G IP phone, tap , and then tap the desired contact.
6. Press Save.

**Tip**
By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

**Placing an Intercom Call to the Target Extension**
You can place an intercom call when the phone is idle or during a call. The target phone plays a warning tone and automatically answers the call in speakerphone (hands-free) mode by default.

When the target phone has an active call, the intercom call is answered automatically after the active call ends.

**Before You Begin**
You need to set an Intercom key in advance.

**Procedure**

1. Press the intercom key.
2. To end the intercom call, press the intercom key again or End Call (EndCall).

**Tip**
You can also press the BLF/BLF List key to initiate an outgoing intercom call to the monitored user. Check with your system administrator to find out if it is available on your phone.

![Image]

Note
Your system administrator can disable the prompt box for new message(s).

You can also read the messages if the prompt box disappears.

Procedure
2. Highlight a desired message, and then press View.
   On the SIP-T48S/T48G IP phone, tap the desired text message to read.
Sending a Text Message

Sending a text message from your IP phone is a quick way of getting in touch with contacts.

Procedure

2. Compose the new text message.
3. On all IP phones except the SIP-T48S/T48G IP phone, press Send.
4. Select the desired account from the From field.
5. Do one of the following:
   - Enter the number you want to send the message to in the To field.
   - For the SIP-T46S/T46G IP phone, highlight the To field. Press Directory (Dir), and then select a desired contact from the Directory list(s).

   For the SIP-T48S/T48G IP phone, tap , and then tap the desired contact.
6. Press Send to send the message.

Replying to a Text Message

You can reply a message after reading a text message.

Procedure

2. Highlight the desired message, and then press Reply.
   - On the SIP-T48S/T48G IP phone, tap the desired message, and then tap Reply.
3. Compose the new text message.
4. Press Send.

Deleting a Text Message

You can delete messages from your phone after reading.

Procedure

1. Navigate to Menu -> Message -> Text Message -> Inbox (Sentbox, Outbox or Draftbox).
2. Highlight the desired message.
   - On the SIP-T48S/T48G IP phone, tap the desired message.
3. Press Option, select Delete.
   - On the SIP-T48S/T48G IP phone, tap Delete.
   - On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, press Delete.
   - A confirmation message is displayed, confirming that you want to delete the message.
4. Press OK to delete.
You can also delete all text messages by selecting the Delete All.

Voice Mail

Voice Mail feature allows you to leave voice mails for someone or listen to your voicemail messages on your IP phone. This feature is set up on the server side and not all servers support this feature.

Topics

Setting the Voice Mail Code
Receiving a Voice Message
Leaving Voice Mails
Listening to Voice Mails

Setting the Voice Mail Code
If you want to connect your phone to the message center, you need to set the voice mail code on your phone.

Before You Begin
Get the voice mail code from your system administrator.

Procedure
   You can also press the MESSAGE key when the voice mail code is not configured.
2. Enter the voice mail code (for example, *4) in the desired account field.
3. Press Save.

Receiving a Voice Message
When receiving a new voice mail, the phone plays a warning tone and the power LED indicator slowly flashes red. A message of “n New Voice Mail(s)” (“n” indicates the number of unread voice messages) is displayed on the LCD screen.

If the voice mail prompt box disappears, it will not pop up again unless the user receives a new voice mail or the user re-registers the account that has unread voice mail(s).

Note
Your system administrator can disable the prompt box for new message(s).

Leaving Voice Mails
You can leave a voice mail for someone when he/she is busy or inconvenient to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

Listening to Voice Mails
When the LCD screen prompts that the phone receives a new voice mail, you can press the MESSAGE key or Connect soft key to dial out the voice mail access code directly, or press the Exit soft key to close the prompt box when you are not ready to listen to your voice mail.
You can also listen to your voice mails after the voice mail pop-up message box disappears.

**Before You Begin**

You need to set the voice mail code in advance.

**Procedure**

   The LCD screen displays the amount of new and old voice mails.
2. Highlight an account, and then press Connect.
   On the SIP-T48S/T48G IP phone, tap the account.
3. Follow the voice prompt to listen to your voice mails.

**Hot Desking**

Hot desking is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long, which means that actual personal offices would be often vacant, consuming valuable space and resources.

You can use hot desking to log out from the current account and then log into a new account. As a result, many users can share one same phone resource at different times.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hot desking is not available on all servers. Contact your system administrator for more information.</td>
</tr>
</tbody>
</table>

**Before You Begin**

Your system administrator has set a Hot Desking key for you to use this feature. Get the login account information from your system administrator.

**Procedure**

1. Press the Hot Desking key when the phone is idle.
   A confirmation message is displayed, confirming that you want to clear the account configuration.
2. Press OK.
   Registration configurations of all accounts on the phone will be cleared immediately.
The login wizard will be displayed.

3. Enter the login information.
4. Press Save to login.

**Automatic Call Distribution (ACD)**

ACD is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. ACD on all IP phones allows the ACD system to distribute large volumes of incoming calls to the registered ACD users.

ACD is not available by default. Check with your system administrator to find out if this feature is available on your phone.

**Topics**
- Logging into the ACD System
- Changing the ACD Status

**Logging into the ACD System**

You can log into the ACD system. After logging in, you are ready to receive calls from the ACD system.

**Before You Begin**

Your system administrator has set an ACD key for you to log into the ACD system. Get the User ID and Password to access the ACD system from your system administrator.

**Procedure**

1. Press the ACD key when the phone is idle.
   The LCD screen prompts you the following information:
   - **User ID**: the identity used to log into the queue.
   - **Password**: the password used to log into the queue.

   ![ACD Login](image)

2. Press Login to log in.

**Changing the ACD Status**

You can press the ACD key to show your current ACD user status.

When you set the ACD user status to be available, the ACD key icon indicator will become and solid on the SIP-T48S/T48G IP phone, the ACD key LED glows green, the server begins distributing calls to your IP phone.
When you set the ACD user status to be unavailable, the ACD key icon indicator will become on the SIP-T48S/T48G IP phone, the ACD key LED flashes green, the server temporarily stops distributing calls to your IP phone.

**Procedure**

1. Press the Available (Avail)/Unavailable (Unavail) soft key. ACD user status synchronizes on both IP phone and ACD system.
2. To log out of the ACD system, press the Logout soft key.

Expansion Module and Your Phone

Supported Accessories

You can use your phone with different types of accessories. The following optional accessories need to purchase separately if required for your particular phone:

- Headset YHS32/YHS33
- Wireless Headset Adapter EHS36
- Bluetooth USB Dongle BT40
- Wi-Fi USB Dongle WF40
- Expansion Module EXP40

Check with your system administrator to find out which of these applications or accessories are available on your phone.

Caution

We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in poor performance.

Headset

Yealink IP phone supports wired or wireless headset, USB headset and Bluetooth headset to place and answer calls.

You can connect an analog headset to all IP phones or connect a USB headset to the SIP-T48S/T48G/T46S/T46G/T42S/T41S IP phones. You can also pair and connect a Bluetooth headset with your SIP-T48S/T48G/T46S/T46G/T42S/T41S IP phone. On all IP phones, you can use a wireless headset adapter EHS36 to connect an EHS-compatible wireless headset.

Note

Your system administrator can disable the headset feature. Check with your system administrator to find out if it is available on your phone.

Topics

Analog Headset
Wireless Headset
Bluetooth Headset
USB Headset
Using Headsets
Analog Headset
If you want to use an analog headset, you require an optional headset YHS32/YHS33.

Connecting a YHS32/YHS33 Headset

Procedure
1. Simply insert the headset connector into the headset port on the back of your IP phone.
   For the information on how to connect headset YHS32/YHS33, refer to the YHS32/YHS33 user guide on Yealink Technical Support page.

Wireless Headset
You can use most wireless headsets with your phone.

EHS36 provides the technical interface between your IP phone and an EHS-compatible wireless headset, such as Sennheiser/Jabra (GN Netcom) or Plantronics headset.

For more information on how to connect EHS36, see the EHS36 User Guide on Yealink Technical Support page.

After the EHS36 and your headset are connected successfully, you can handle calls by your headset.

For more information on how to use your headset, see your headset documentation from the manufacturer.

Bluetooth Headset
You can use a Bluetooth headset to handle calls on the SIP-T48S/T48G/T46S/T46G/T42S/T41S IP phone. If both a Bluetooth headset and an analog headset are connected, only the Bluetooth headset can be used.

For more information, refer to the documentation from your Bluetooth headset manufacturer.

Related Topics

Analog Headset

USB Headset
You can use a USB headset to handle calls on the SIP-T48S/T48G/T46S/T46G/T42S/T41S IP phone.

For a list of supported headsets, refer to Tested headset list compatible with Yealink IP Phone for your IP phone on Yealink Support. USB headsets that are not listed may not function properly if you connect them to your IP phone.

For more information on how to use your USB headset, refer to the related documentation from the manufacturer.

Connecting a USB Headset

Procedure
1. Simply insert the headset connector into the USB port on the back of your IP phone.
   For the information on how to connect a USB headset, see the Quick Start Guide for your IP phone on Yealink Support.
Using Headsets
You can use only one headset at a time. The IP phone will use the headset according to the priority: USB/Bluetooth headset > YHS32/YHS33/wireless headset.

Topics

Deactivating the Headset Mode
Switching Among the Handset, Speakerphone and Headset Modes
Placing Calls
Answering Calls

Activating the Headset Mode
After connecting a headset to your phone, you can activate the headset mode and use the headset when answering and placing calls.

Procedure
1. Press the HEADSET key on the phone.
   The HEADSET key LED glows green except on the SIT-T40P/T40G IP phone, and the headset icon appears on the LCD screen.

Note
You can initiate or end calls by pressing the HEADSET key. Check with your system administrator to find out if it is available on your phone.

Deactivating the Headset Mode
If you do not want to use a headset to handle calls, you can deactivate the headset mode.

Procedure
1. Press the HEADSET key again on the phone.
   The HEADSET key LED goes out except on the SIT-T40P/T40G IP phone, and the headset icon disappears from the LCD screen.

Bluetooth
The SIT-T48S/T48G/T46S/T46G/T42S/T41S IP phone supports Bluetooth. Bluetooth enables low-bandwidth wireless connections within a range of 10 meters (32 feet). The best performance is in the range of 1 to 2 meters (3 to 6 feet).

Using Bluetooth Feature

Connecting the Bluetooth USB Dongle BT40

Procedure
1. Insert the USB dongle with "TOP" facing upwards into the USB port on the back of the phone.
For more information on Bluetooth USB dongle BT40, see the user guide on the Bluetooth USB dongle BT40’s support page on Yealink Technical Support.

**Activating the Bluetooth Mode**

When you insert Bluetooth USB dongle BT40 into the USB port on the back of the IP phone, a message is displayed on the LCD screen:

You can press **OK** to activate the Bluetooth mode directly.

If you press **Cancel**, you can activate the Bluetooth mode when you want to use the Bluetooth feature.

**Procedure**

1. Navigate to **Menu > Basic > Bluetooth.**
   - On the SIP-T42S/T41S IP phone, navigate to **Menu > Settings > Basic Settings > Bluetooth.**
2. Select **On** from the **Bluetooth** field.
3. Press **Save** on all IP phones except the SIP-T48S/T48G IP phone.
   - The IP phone scans the available Bluetooth devices automatically.

**Deactivating the Bluetooth Mode**

You can deactivate the Bluetooth mode when you no longer use a Bluetooth device.

**Procedure**

1. Navigate to **Menu > Basic > Bluetooth.**
   - On the SIP-T42S/T41S IP phone, navigate to **Menu > Settings > Basic Settings > Bluetooth.**
2. Select **Off** from the **Bluetooth** field.
3. Press **Save** on all IP phones except the SIP-T48S/T48G IP phone.
   - The IP phone scans the available Bluetooth devices automatically.
   - The Bluetooth device will not be connected anymore, but it will still be paired. When you activate the Bluetooth mode again, the paired Bluetooth device will appear in the **Bluetooth Device(s)** list on the SIP-T48S/T48G IP phone. On other IP phones, the paired Bluetooth device will appear in the **Paired Bluetooth Device** list.

**Using Bluetooth Feature**

When the Bluetooth mode is activated, you can pair and connect your Bluetooth device (Bluetooth headset or Bluetooth-Enabled mobile phone) to the phone. You can scan and pair up to 60 Bluetooth devices with your phone. However, only one device can be connected at a time. If you connect your Bluetooth-Enabled mobile phone to the IP phone, you can synchronize the mobile contacts to the IP phone.

Pairing and Connecting the Bluetooth Headset

Before You Begin
Make sure that the Bluetooth headset is discoverable.

Procedure
1. Navigate to Menu -> Basic -> Bluetooth.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Bluetooth.
2. On the SIP-T46S/T46G/T42S/T41S IP phone, press Scan to search for the Bluetooth devices.
   The phone proceeds to scan the local Bluetooth devices, and LCD screen displays the available Bluetooth devices.

   ![Scan Bluetooth Device](image)

3. Find your Bluetooth headset, and then press Connect.
   On the SIP-T48S/T48G IP phone, tap your Bluetooth headset.
   The Bluetooth icon appears on the LCD screen except on the SIP-T42S/T41S IP phone.

Related Topics
Activating the Bluetooth Mode

Pairing and Connecting the Bluetooth-Enabled Mobile Phone
You can pair and connect the Bluetooth-Enabled mobile phone to the IP phone.

Before You Begin
Make sure that the Bluetooth-Enabled mobile phone is discoverable.

Procedure
1. Navigate to Menu -> Basic -> Bluetooth.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Bluetooth.
2. On the SIP-T46S/T46G/T42S/T41S IP phone, press Scan to search for the Bluetooth-Enabled mobile phone.
3. Find your Bluetooth-Enabled mobile phone, and then press Connect.
The IP phone will prompt the connect passkey on the LCD screen, as shown below:

![Scan Bluetooth Device](image)

4. Make sure your mobile phone is showing the same passkey, and then press OK on both mobile phone and IP phone.

   A message is displayed on the LCD screen:

![Scan Bluetooth Device](image)

5. (Optional.) Press OK to enable the mobile contacts sync feature and the IP phone will sync the mobile contacts temporarily, or press Cancel to disable mobile contacts sync feature and the IP phone will not sync the mobile contacts.

**Note**

If you enable mobile contacts sync feature, you also need to authorize the IP phone to sync the contacts temporarily on the mobile phone.

**Related Topics**

- Disabling the Mobile Contacts Sync Feature

**Before You Begin**
Make sure that the Bluetooth-Enabled mobile phone is paired and connected to your IP phone.

**Procedure**

1. Navigate to **Menu -> Basic -> Bluetooth -> Paired Bluetooth Device**.
   - On the SIP-T48S/T48G IP phone, navigate to **Menu -> Basic -> Bluetooth**.
   - On the SIP-T42S/T41S IP phone, navigate to **Menu -> Settings -> Basic Settings -> Bluetooth -> Paired Bluetooth Device**.

2. Press **Option**, and then select **Detail**.
   - On the SIP-T48S/T48G IP phone, tap \(\ldots\) after the connected Bluetooth-Enabled mobile phone name.

3. Select **On** from the **Mobile Contacts Sync** field.

You need to authorize the IP phone to synchronize the contacts temporarily on the mobile phone first, and then the mobile contacts directory will appear in the IP phone directory list.

You can edit the device name of your phone to display in scanning list of other Bluetooth devices.

**Before You Begin**
Make sure that the Bluetooth mode is activated.

**Procedure**
1. Navigate to Menu > Basic > Bluetooth > Edit My Device Information.
   On the SIP-T42S/T41S IP phone, navigate to Menu > Settings > Basic Settings > Bluetooth > Edit My Device Information.
   The LCD screen displays the device name and Bluetooth dongle MAC address.
2. Enter the desired name in the Device Name field.
3. Press Save.

**Related Topics**
Activating the Bluetooth Mode

**Deleting the Paired Bluetooth Device**
You can delete your Bluetooth device from your phone. When you delete the Bluetooth device, it disappears from the Paired Bluetooth Device list.

**Procedure**
1. Navigate to **Menu -> Basic -> Bluetooth -> Paired Bluetooth Device**.
   On the SIP-T48S/T48G IP phone, navigate to **Menu -> Basic -> Bluetooth -> Bluetooth Device(s)**.

2. Press **Option**, and then select **Delete** or **Delete All**.
   On the SIP-T48S/T48G IP phone, tap (••• ••• •••) after the Bluetooth device, and then select **Delete**. Or tap **Delete All**. A confirmation message is displayed, confirming that you want to delete the device.

3. Press **OK** to delete.

### Disconnecting the Bluetooth Device

You can disconnect the Bluetooth device from your phone. After you disconnect the Bluetooth device, it remains paired so you can easily connect it to your IP phone next time.

#### Procedure

1. Navigate to **Menu -> Basic -> Bluetooth -> Paired Bluetooth Device**.
2. Highlight the connected Bluetooth device, and then press **Disconnect**.
   On the SIP-T48S/T48G IP phone, tap the connected Bluetooth device.

   The Bluetooth device is disconnected when deactivating the Bluetooth mode.

#### Tip

You can quickly disconnect your Bluetooth headset by turning your headset off. When you turn your Bluetooth headset on, the Bluetooth headset is connected again.

### Connecting the Wi-Fi USB Dongle WF40

#### Procedure

1. Insert the Wi-Fi USB Dongle WF40 into the USB port on the back of the phone.

   For more information on WF40, refer to the Wi-Fi USB dongle WF40 user guide on Yealink Technical Support page.

#### Activating the Wi-Fi Mode

When Wi-Fi USB dongle WF40 is connected to the USB port on the back of the IP phone, a message is displayed on the LCD screen:
You can press OK to activate Wi-Fi mode directly and to scan Wi-Fi devices automatically.

If you press Cancel, you can activate Wi-Fi mode manually when you want to use the Wi-Fi feature.

**Procedure**

1. Navigate to Menu > Basic > Wi-Fi.
   - On the SIP-T42S/T41S IP phone, navigate to Menu > Settings > Basic Settings > Wi-Fi.
2. Select On from the Wi-Fi field.
3. Press Save on all IP phones except the SIP-T48S/T48G IP phone.
   - The IP phone scans the available wireless networks in your area.

**Deactivating the Wi-Fi Mode**

You should deactivate the Wi-Fi mode when you need to connect your phone to the wired network.

**Procedure**

1. Navigate to Menu > Basic > Wi-Fi.
   - On the SIP-T42S/T41S IP phone, navigate to Menu > Settings > Basic Settings > Wi-Fi.
2. Select Off from the Wi-Fi field.
3. Press Save on all IP phones except the SIP-T48S/T48G IP phone.

**Using the Wi-Fi Feature**

When the Wi-Fi mode is activated on the IP phone, you can connect your phone to a desired wireless network.

**Topics**

- Connecting to the Wireless Network

**Connecting to the Wireless Network**

There are three ways to connect IP phone to the wireless network:

- Connecting to an Available Wireless Network Manually
- Connecting to the Wireless Network Using Wi-Fi Protected Setup (WPS)
- Adding a Wireless Network Manually
Connecting to an Available Wireless Network Manually

Before You Begin
Get the password of the wireless network from your system administrator. Make sure that the Wi-Fi mode is activated.

Procedure
1. Navigate to Menu -> Basic -> Wi-Fi.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Wi-Fi.
2. On the SIP-T46S/T46G/T42S/T41S IP phone, highlight the X Available Network(s) (X represents the number of available networks), and then press Enter.
3. (Optional.) To re-search the available network, press Scan.
4. Select the desired wireless network and then press Connect.
   On the SIP-T48S/T48G IP phone, tap the desired wireless network to connect to your IP phone. Or tap after the desired wireless network, and then tap Connect.
5. If the network is secure, enter its password.
6. Press OK.

Related Topics
Activating the Wi-Fi Mode
Connecting to the Wireless Network Using Wi-Fi Protected Setup (WPS)
Wi-Fi Protected Setup (WPS) provides simplified mechanisms to configure secure wireless networks which can automatically configure a wireless network with a network name (SSID) and strong WPA data encryption and authentication.

There are two methods supported by Yealink IP phones in the Wi-Fi protected setup:
   - Push Button Configuration (PBC): The user simply has to press WPS key on both the IP phone and gateway/router to connect.
   - Personal Identification Number (PIN): The user has to enter a PIN generated randomly by the IP phone on the gateway/router to connect.

Before You Begin
Make sure that the Wi-Fi mode is activated.

Push Button Configuration (PBC)

Procedure
1. Navigate to Menu -> Basic -> Wi-Fi.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Wi-Fi.
2. Press the WPS, and then select WPS.
   On the SIP-T48S/T48G IP phone, tap WPS.
   The LCD screen prompts "WPS has been activated, connect in 120s!".
3. Long press the WPS key on your gateway/router.
   Once WPS setup has completed successfully, the LCD screen will prompt "Connect Success.".

Personal Identification Number (PIN)
Procedure

1. Navigate to Menu -> Basic -> Wi-Fi.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Wi-Fi.

2. Press the WPS, and then select WPS-PIN.
   On the SIP-T48S/T48G IP phone, tap WPS-PIN.
   The LCD screen prompts “Please input below PIN code on your Wi-Fi router and press OK to connect: xxx”.

3. Log into your gateway/router’s web interface, and configure it to search the clients. For more information, refer to the documentation from the gateway/router manufacturer.
   Once WPS-PIN setup has completed successfully, the gateway/router’s web interface will prompt success.

Activating the Wi-Fi Mode

Adding a Wireless Network Manually

If your gateway/router has SSID broadcast disabled, it might not appear in the scanning results. In that case, you must manually add a wireless network. The connected wireless networks will be saved to Known Network(s) list.

Before You Begin

Get the available wireless network information from your system administrator. Make sure that the Wi-Fi mode is activated. The Known Network(s) list can store up to 5 wireless networks.

Procedure

1. Navigate to Menu -> Basic -> Wi-Fi.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Wi-Fi.

2. Highlight Known Network(s), and then press Add.
   On the SIP-T48S/T48G IP phone, tap Add.

3. Use the WLAN settings obtained from your gateway/router to configure this WLAN Profile on the IP phone. Do the following:
   - If you select None or WEP from the Security Mode field, enter the desired values in the corresponding fields.
   - If you select WPA-PSK, WPA2-PSK, WPA-EAP or WPA2-EAP from the Security Mode field, select the desired cipher type first and enter the desired values in the corresponding fields.

4. Press Save.
   The connected wireless networks will be saved to Known Network(s) list.

Related Topics

Activating the Wi-Fi Mode

Viewing the Wireless Network Information

You can view the wireless network information when the Wi-Fi mode is activated.

Procedure

1. Navigate to Menu -> Basic -> Wi-Fi -> X Available Network(s) (X represents the number of available networks).
   On the SIP-T48S/T48G IP phone, navigate to Menu -> Basic -> Wi-Fi.
   On the SIP-T42S/T41S IP phone, navigate to Menu -> Settings -> Basic Settings -> Wi-Fi -> X Available Network(s).

2. Press Detail to view the detailed wireless network information (for example, Profile Name, SSID or Signal Strength).
Optional Accessories with Your Phone

On the SIP-T48S/T48G IP phone, tap (…) after the desired wireless network to view the detailed wireless network information (for example, Profile Name, SSID or Signal Strength).

If the IP phone is connected to a wireless network successfully, you can also navigate to Menu->Basic->Wi-Fi->Wi-Fi Status to view the connected wireless network information.

Managing the Saved Wireless Network

Once the IP phone has been connected to a wireless network successfully, this wireless network profile will be saved in Known Network(s) list. The next time you activate Wi-Fi mode, the IP phone will be automatically connected to the wireless network which has the highest priority (the top one). Up to 5 wireless network profiles can be saved in Known Network(s) list. If you want to add a new one when the IP phone has already saved 5 wireless network profiles, please delete an older one before adding.

Procedure

1. Navigate to Menu->Basic->Wi-Fi->Known Network(s).

On the SIP-T42S/T41S IP phone, navigate to Menu->Settings->Basic Settings->Wi-Fi->Known Network(s).

2. Press Option.

On the SIP-T48S/T48G IP phone, tap (…).

3. Do one of the following:
   - Select Edit to edit the wireless network profile, and press Save.
   - Select Move Up or Move Down to change the priority of the wireless network.
   - Select Delete or Delete All to delete the saved wireless network profile.

Disconnecting the Wireless Network Connection

Procedure

1. Navigate to Menu->Basic->Wi-Fi.

On the SIP-T42S/T41S IP phone, navigate to Menu->Settings->Basic Settings->Wi-Fi.
2. Do one of the following:
   - On the SIP-T46S/T46G/T42S/T41S IP phone, highlight the **Available Network(s)** (X represents the number of available networks), and then press **Enter**.
     Highlight the connected wireless network, and then press **Disconnect**.
   - On the SIP-T48S/T48G IP phone, tap the connected wireless network or tap (⋯) -> **Disconnect**.

You can also disconnect the wireless network when deactivating the Wi-Fi mode.

**Related Topics**

**Deactivating the Wi-Fi Mode**

**Expansion Module and Your Phone**

The expansion module is a console you can use to connect to an IP phone to add additional line keys and expand the functions of your phone. Yealink SIP-T48S/T48G/T46S/T46G IP phone supports expansion module EXP40. It has two pages of 20 flexible ext keys and it can be programmed up to 40 various features. This section provides you how to connect the expansion module EXP40, how to assign the features for ext keys and how to adjust the contrast and backlight of expansion module EXP40.

For more information on expansion module EXP40, refer to the LCD Expansion Module EXP40 user guide on Yealink Technical Support page.

**Topics**

- Connecting the Expansion Module
- Assigning the Features for Ext Keys
- Adjusting the Contrast of Expansion Module
- Adjusting the Backlight of Expansion Module

**Connecting the Expansion Module**

**Procedure**

1. Connect the expansion module to the IP phone using the supplied connecting sheet and screws.
2. Connect the supplied cord from the Ext jack on the host phone to the Ext in jack on the expansion module.

**Assigning the Features for Ext Keys**

You can customize features for ext keys on the connected IP phone.

**Procedure**

1. Long press the desired ext key on expansion module.
   - The IP phone LCD screen will enter the user setting interface of this key.
2. Customize the specific feature for this key on the IP phone.
3. Press **Save**.

**Adjusting the Contrast of Expansion Module**

You can configure the contrast of the expansion module via the host phone.

**Procedure**

1. Navigate to **Menu** -> **Basic** -> **Display** -> **Contrast**.
   - If expansion module is not connected to the phone, the Contrast screen displays "No EXP".
2. Select the desired value between 1 and 10 (highest intensity) from the **Contrast** field.
3. Press **Save**.

**Adjusting the Backlight of Expansion Module**

When you change the backlight intensity settings on your SIP-T48S/T48G/T46G/T46S IP phone, the backlight on expansion module connected to your phone automatically changes to match the new settings.

Updating the Phone Configuration

Diagnosing the Network

The wrong network settings may result in inaccessibility of your phone and poor network performance. Your system administrator may ask you to use the ping or trace route to troubleshoot network connectivity problems.

Topics
Checking the Network Using “Ping” Method
Checking the Network Using “Trace Route” Method

Checking the Network Using “Ping” Method

Procedure
1. Navigate to Menu > Features > Diagnostics > Network > Ping.
2. Enter the desired IP address or URL in the Ping IP or URL field.
3. Press Start.  
   The screen displays the network status information.

4. Press Back to go back to the preview screen.

Checking the Network Using “Trace Route” Method

Procedure
1. Navigate to Menu > Features > Diagnostics > Network > Trace Route.
2. Enter the desired IP address or URL in the Trace Route IP or URL field.
3. Press Start.  
   The screen displays the network status information.
4. Press Back to go back to the preview screen.

**Rebooting Your Phone**

The improper operation may cause malfunction. If malfunction occurs, your system administrator may ask you to reboot your phone.

**Procedure**

1. Navigate to Menu → Basic → Reboot.
   On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu → Settings → Basic Settings → Reboot.
   A confirmation message is displayed, confirming that you want to reboot the phone.

2. Press OK to reboot the phone.

   **Tip**
   You can also long press the X key when the phone is idle to reboot the phone.

**Resetting to Factory Settings**

Generally, some common issues may occur while using the IP phone. Your system administrator may ask you to reset your phone to factory configurations after you have tried all troubleshooting suggestions but still do not solve the problem. This operation will delete all your personal configuration settings, and reset all settings to the factory defaults. Check with your system administrator if the personalized settings are kept before resetting your phone to factory settings.

**Procedure**

1. Navigate to Menu → Advanced → Reset Config.
   On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to Menu → Settings → Advanced Settings → Reset Config.

2. Highlight the Reset to Factory Settings, and then press Reset.
   A confirmation message is displayed, confirming that you want to reset the setting.

3. Press OK.
   The phone begins resetting.

   **Tip**
   You can also long press the OK key when the phone is idle.

   After reset, the LCD screen prompts "Welcome Initializing...Please wait".
Maintaining Your Phone

The phone will be reset successfully after startup.

**Note**
Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.

**Updating the Phone Configuration**

Your system administrator may ask you to update your phone configurations.

**Procedure**

1. Navigate to **Menu > Basic > Update Configuration**.
   - On the SIP-T42S/T42G/T41S/T41P/T40P/T40G IP phone, navigate to **Menu > Settings > Basic Settings > Update Configuration**.
   - A message is displayed on the LCD screen:

   ![Update Configuration Message](image)

   - **Tip**
     - You can also long press the REDIAL key when the phone is idle to update the phone configuration.

2. Press **OK**.
