Yealink IP PHONE
SIP-T23P & SIP-T23G

Quick Start Guide (V81.70)

www.yealink.com

Applies to firmware version 44.81.0.15 or later.
Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

Note: The models displayed on the phone differ from each other. The packaging content "IP Phone" listed above takes a SIP-T23G IP phone as an example. We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in reduced performance.

Assembling the Phone

1. Attach the stand, as shown below:

Note: The hookswitch tab has a lip which allows the handset to stay on-hook when the IP phone is mounted vertically.
2. Connect the handset and optional headset, as shown below:

3. Connect the network and power, as shown below:

You have two options for network and power connections. Your system administrator will advise you which one to use.

Note: The IP phone should be used with Yealink original power adapter (5V/600mA) only. The use of the third-party power adapter may cause the damage to the phone. If you are connecting a PC to your phone, we recommend that you use the Ethernet cable provided by Yealink. If inline power (PoE) is provided, you do not need to connect the power adapter. Make sure the hub/switch is PoE-compliant.

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via phone user interface or web user interface.
Configuring Your Phone

Configuring via web user interface

Accessing the web user interface:
1. Press the OK key when the phone is idle to obtain the IP address of the phone.
2. Open the web browser of your computer, enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10"), and then press the Enter.
3. Enter the user name (default: admin) and password (default: admin) in the login page and click Confirm.

Network Settings: Click on Network->Basic->IPv4 Config
You can configure the network settings in the following ways:

DHCP: By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Static IP Address: If your phone cannot contact a DHCP server for any reason, you need to configure the IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

Note: The IP phone also supports IPv6, but IPv6 is disabled by default. The wrong network settings may result in inaccessibility of your phone and may have an impact on the network performance. Contact your system administrator for more information.

Account Settings: Click on Account->Register->Account X (X=1,2,3)

Parameters of the account:
- Register Status: It shows the register status of the current account.
- Line Active: You can select Enabled/Disabled to enable/disable the account.
- Label: It is shown on the LCD screen to identify the account.
- Display Name: It is shown as Caller ID when placing a call.
- Register Name: It is authenticated ID for authentication provided by ITSP (required).
- User Name: It is provided by ITSP for registration (required).
- Password: It is provided by ITSP for registration (required).
- Server Host: It is provided by ITSP for registration (required).

Register status icons on the LCD screen:
- Registered
- Registering
- Register Failed

Note: Check with your system administrator if any error appears during the registration process or if a specific configuration is required for your registration.

Configuring via phone user interface

Network Settings:
Press the Menu soft key when the phone is idle, select Settings->Advanced Settings (default password: admin)->Network->WAN Port/VLAN/Web Server/802.1x/VPN/LLDP/CDP/NAT to configure the network.

Account Settings:
Press the Menu soft key when the phone is idle, select Settings->Advanced Settings (default password: admin)->Accounts to configure the account.

Note: For more information on account parameters, refer to Configuring via web user interface above.
Basic Call Features

Placing a Call

Using the handset:
1. Pick up the handset.
2. Enter the number, and then press the Send soft key.

Using the speakerphone:
1. With the handset on-hook, press \textbf{Speakerphone}.
2. Enter the number, and then press the Send soft key.

Using the headset:
1. With the headset connected, press \textbf{Headset} to activate the headset mode.
2. Enter the number, and then press the Send soft key.

Note: During a call, you can alternate between the headset, hands-free speakerphone and handset modes by pressing the \textbf{Headset} key, the \textbf{Speakerphone} key or by picking up the handset. Headset mode requires a headset connected.

Answering a Call

Using the handset:
Pick up the handset.

Using the speakerphone:
Press \textbf{Speakerphone}.

Using the headset:
Press \textbf{Headset}.

Note: You can reject an incoming call by pressing the \textbf{Reject} soft key.

Ending a Call

Using the handset:
Hang up the handset or press the EndCall soft key.

Using the speakerphone:
Press \textbf{Speakerphone} or press the EndCall soft key.

Using the headset:
Press the EndCall soft key.

Redial

- Press \textbf{Redial} to enter the Placed Calls list, press \textbf{Up} or \textbf{Down} to select the desired entry, and then press \textbf{Redial} or the Send soft key.
- Press \textbf{Redial} twice when the phone is idle to dial out the last dialed number.

Call Mute and Un-mute

- Press \textbf{Mute} to mute the microphone during a call.
- Press \textbf{Mute} again to un-mute the call.

Call Hold and Resume

To place a call on hold:
Press the Hold soft key during an active call.

To resume the call, do one of the following:

- If there is only one call on hold, press the Resume soft key.
- If there is more than one call on hold, press \textbf{Up} or \textbf{Down} to select the desired call, and then press the Resume soft key.
Call Transfer

You can transfer a call in the following ways:

Blind Transfer
1. Press \[ \text{Conf} \] or the \[ \text{Tran} \] soft key during a call. The call is placed on hold.
2. Enter the number you want to transfer to.
3. Press \[ \text{Conf} \] or the \[ \text{Tran} \] soft key.

Semi-Attended Transfer
1. Press \[ \text{Conf} \] or the \[ \text{Tran} \] soft key during a call. The call is placed on hold.
2. Enter the number you want to transfer to, and then press \[ \# \].
3. Press \[ \text{Conf} \] or the \[ \text{Tran} \] soft key when you hear the ring-back tone.

Attendened Transfer
1. Press \[ \text{Conf} \] or the \[ \text{Tran} \] soft key during a call. The call is placed on hold.
2. Enter the number you want to transfer to, and then press \[ \# \].
3. Press \[ \text{Conf} \] or the \[ \text{Tran} \] soft key when the second party answers.

Call Forward

To enable call forward:
1. Press the \[ \text{Menu} \] soft key when the phone is idle, and then select Features->Call Forward.
2. Select the desired forward type:
   - \text{Always Forward}----Incoming calls are forwarded unconditionally.
   - \text{Busy Forward}----Incoming calls are forwarded when the phone is busy.
   - \text{No Answer Forward}----Incoming calls are forwarded if not answered after a period of time.
3. Enter the number you want to forward to. For \text{No Answer Forward}, press \[ 4 \] or \[ 6 \] to select the desired ring time to wait before forwarding from the \text{After Ring Time} field.
4. Press the \[ \text{Save} \] soft key to accept the change.

Call Conference
1. Press the \[ \text{Conf} \] soft key during an active call. The call is placed on hold.
2. Enter the number of the second party, and then press the \[ \text{Send} \] soft key.
3. Press the \[ \text{Conf} \] soft key again when the second party answers. All parties are now joined in the conference.
4. Press the \[ \text{EndCall} \] soft key to disconnect all parties.

Note: You can split the conference call into two individual calls by pressing the \[ \text{Split} \] soft key.

Speed Dial

To configure a speed dial key:
1. Press the \[ \text{Menu} \] soft key when the phone is idle, and then select Features->DSS Keys.
2. Select the desired line key, and then press the \[ \text{Enter} \] soft key.
3. Select \text{Speed Dial} from the \text{Type} field, select the desired line from the \text{Account ID} field, enter a label in the \text{Label} field and then enter the number in the \text{Value} field.
4. Press the \[ \text{Save} \] soft key to accept the change.

To use the speed dial key:
Press the speed dial key to dial out the preset number.
**Voice Message**

Message waiting indicator on the idle screen indicates that one or more voice messages are waiting at the message center. The power indicator LED slowly flashes red and the **MESSAGE** key LED lights up.

**To listen to voice messages:**
1. Press **MESSAGE** or the **Connect** soft key.
2. Follow the voice prompts to listen to your voice messages.

---

**Customizing Your Phone**

**Call History**
1. Press the **History** soft key when the phone is idle, press ↑ or ↓ to scroll through the list.
2. Select an entry from the list, you can do the following:
   - Press the **Send** soft key to call the entry.
   - Press the **Delete** soft key to delete the entry from the list.
If you press the **Option** soft key, you can also do the following:
   - Select **Detail** to view detailed information about the entry.
   - Select **Add to Contact** to add the entry to the local directory.
   - Select **Add to Blacklist** to add the entry to the blacklist.
   - Select **Delete All** to delete all entries from the list.

**Contact Directory**

**To add a contact:**
1. Press the **Dir** soft key when the phone is idle, and then select **All Contacts**.
2. Press the **Add** soft key to add a contact.
3. Enter a unique contact name in the **Name** field, and enter the phone number in the proper field.
4. Press the **Add** soft key to accept the change.

**To edit a contact:**
1. Press the **Dir** soft key when the phone is idle, and then select **All Contacts**.
2. Press ↑ or ↓ to select the desired entry, press the **Option** soft key and then select **Detail**.
3. Edit the contact information.
4. Press the **Save** soft key to accept the change.

**To delete a contact:**
1. Press the **Dir** soft key when the phone is idle, and then select **All Contacts**.
2. Press ↑ or ↓ to select the desired entry, press the **Option** soft key and then select **Delete**.
3. Press the **OK** soft key when the LCD screen prompts “Delete selected item?”.

**Volume Adjustment**
- Press **Volume** during a call to adjust the receiver volume of the handset/speakerphone/headset.
- Press **Volume** when the phone is idle or ringing to adjust the ringer volume.

**Ring Tones**
1. Press the **Menu** soft key when the phone is idle, and then select **Settings** -> **Basic Settings** -> **Sound** -> **Ring Tones**.
2. Press ↑ or ↓ to select **Common** or the desired account and then press the **Enter** soft key.
3. Press ↑ or ↓ to select the desired ring tone.
4. Press the **Save** soft key to accept the change.

---

Note: You can add contacts from call history easily. For more information, refer to **Call History** above.
About us

Founded in 2001, Yealink, a leading provider of VoIP Phone and IP communication solutions, has been focusing on VoIP products characterized by reliable quality, easy deployment and affordable price for more than a decade. Today, customers from over 140 countries rely on Yealink as the backbone of global collaboration to extend the value of network communications.

More about Yealink

Since 2001, Yealink has continued to develop state-of-the art, hi-tech VoIP communication terminals that include IP video phones, IP phones and USB phones. With a worldwide market in more than 140 countries, the company has also established a first-class international service network.

Our priorities are quality, functionality, ease-of-use, customer support and competitive pricing. To provide new solutions for the future in this fast-evolving sector, Yealink’s large, talented and highly-experienced VoIP R&D team is totally committed to the pursuit of excellence.

To date, we have passed more than 80 interoperability tests and meet certification requirements set by leading VoIP system and platforms. Yealink works in close partnership with T-Mobile, Telefonica, Portugal Telecom and other leading telecommunication service providers.
